Introduction

Give your brand the web presence it deserves with the number #1 Odoo theme in the market: Theme Scita. One of the most elegant themes which are developed keeping 20+ industries in mind. We've designed this theme considering e-commerce, healthcare, fashion, finance, and many more industries. It is perfect for every business. Designing your website has never been this easy with our theme Scita.

Benefits of Odoo Theme Scita

- Helps in ranking your business higher with faster page loading speed.
- Theme Scita includes a powerful mega menu, drag-and-drop snippets, elegant header footer options, and more.
- It is well-coded, organized, and modular to help you get the aspired look for your website.

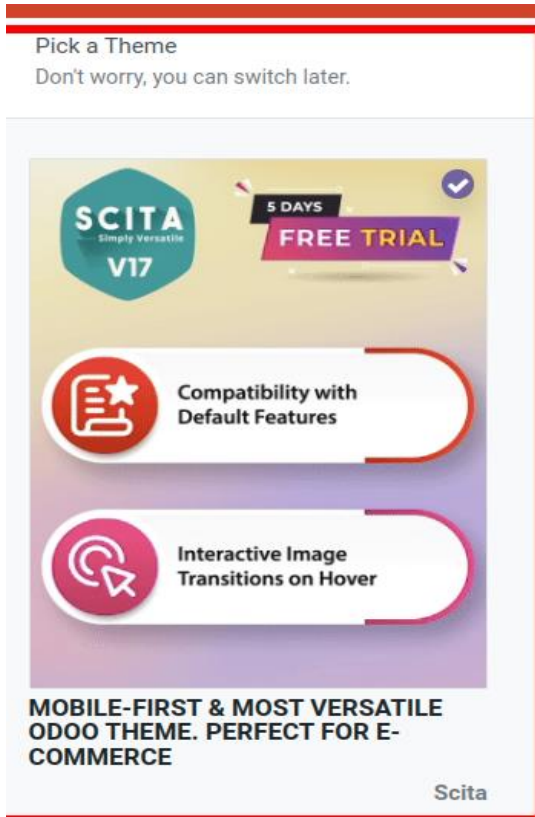

Pre-requisites

- Following points must be followed before starting the plug-in installation:
- You should log in as an Admin in Odoo.
- Check that your Odoo Instance is compatible with Scita Theme.
- An e-commerce module should be present in your instance to use this theme.

Installation

Installation Steps

- Download the latest Odoo version. Go to the website record and install Theme Scita from there.
- Download **Theme Scita** from the 'Odoo store'. Once downloaded, you will get a folder with the name 'theme_scita'.
- You need to add this folder in your addons directory and restart the Odoo server instance and update your App List. Now go to **WEBSITE -> Edit -> Theme**.
- In website settings, select a website in which you want 'Theme Scita' to be installed.
- Click on the '**Switch a Theme**' button. On clicking, you will get redirected to a list of themes available.
- Click on **Theme Scita** to install it on your website.
- After selection, click on the **Save** button to save the changes.
- After installation, you can see theme details under the 'Website' section.

- From here, you can insert your Website Name & upload a Favicon Image (icon/logo).
- You can configure other settings like Website Language, Default Language, and many other settings.
- After Configuring all the setups, click on the Save button to save the changes.

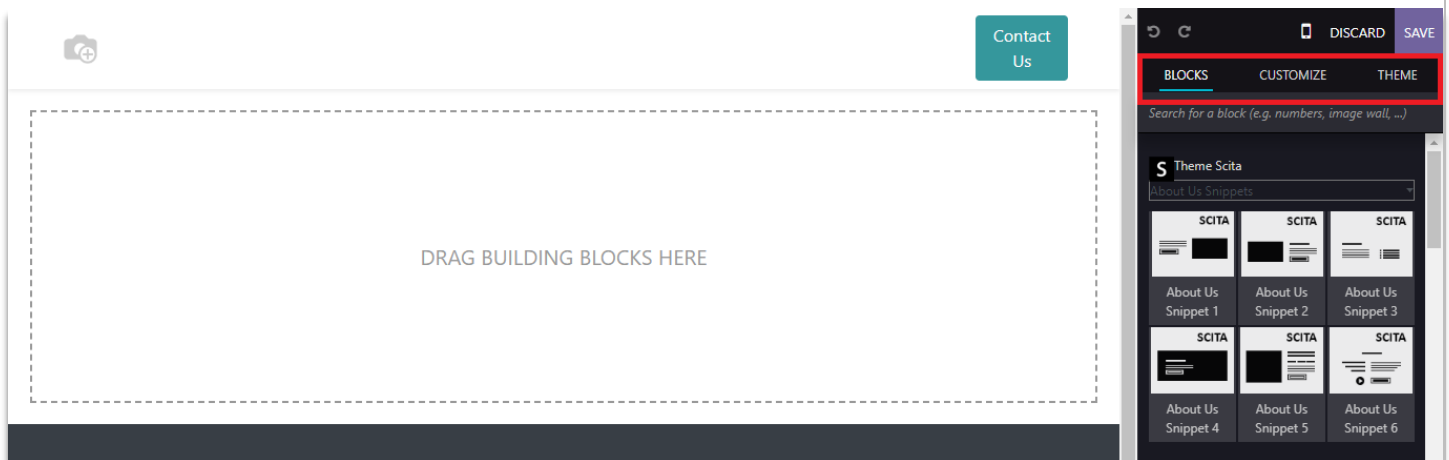

Theme Configuration

Customize Theme

- After Installing the theme, go to **Website** and click on '✎ Edit' which is on the right side of the page.

- After clicking on '✎ Edit', it will open pop up box with different 3 **tabs** to set/change the themestyles:
 - Blocks
 - Customize
 - Theme
- From the available options, set the option which suits best for the website.

Blocks

- You will get the snippet list of the “Theme Scita” drop-down option under the “Blocks” tab.

Customize

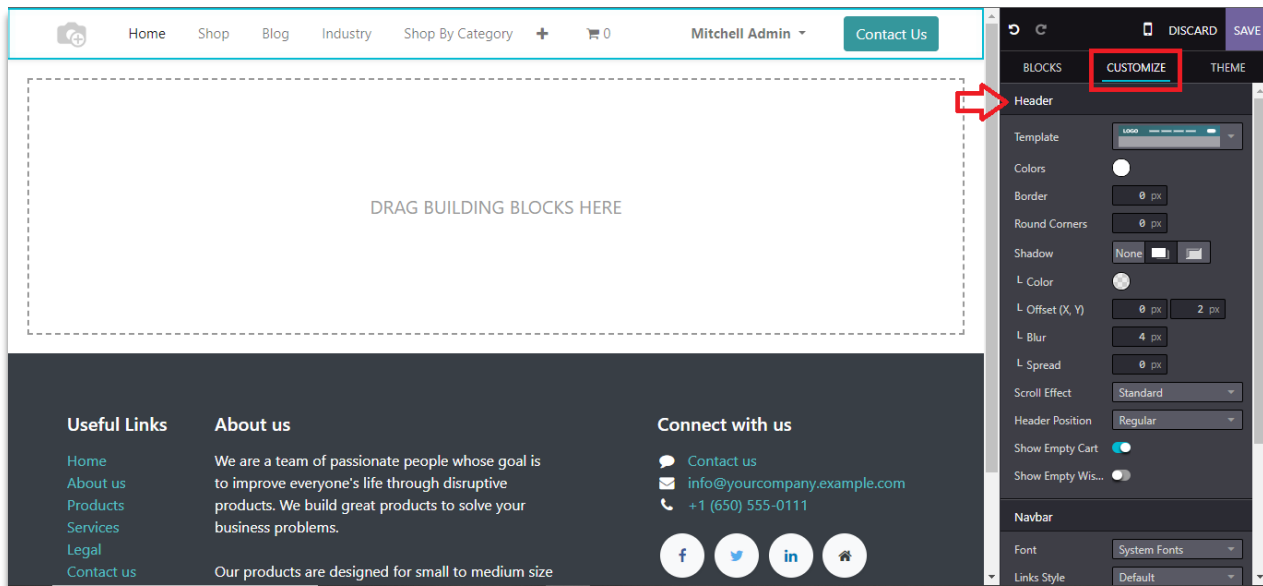

- You can customize the website ‘Header’ & ‘Footer’ under the “Customize” tab.

Theme

- You can customize the ‘Theme color’ and its options like ‘templates’, ‘fonts’, ‘buttons’, etc. under the “Theme” tab.

Header/Footer Configurations

- You can customize and configure the header section by 'double-clicking' on it. Once you double-click on the header section, the **Customize** tab will be enabled from where you can configure and customize the options of the header section.

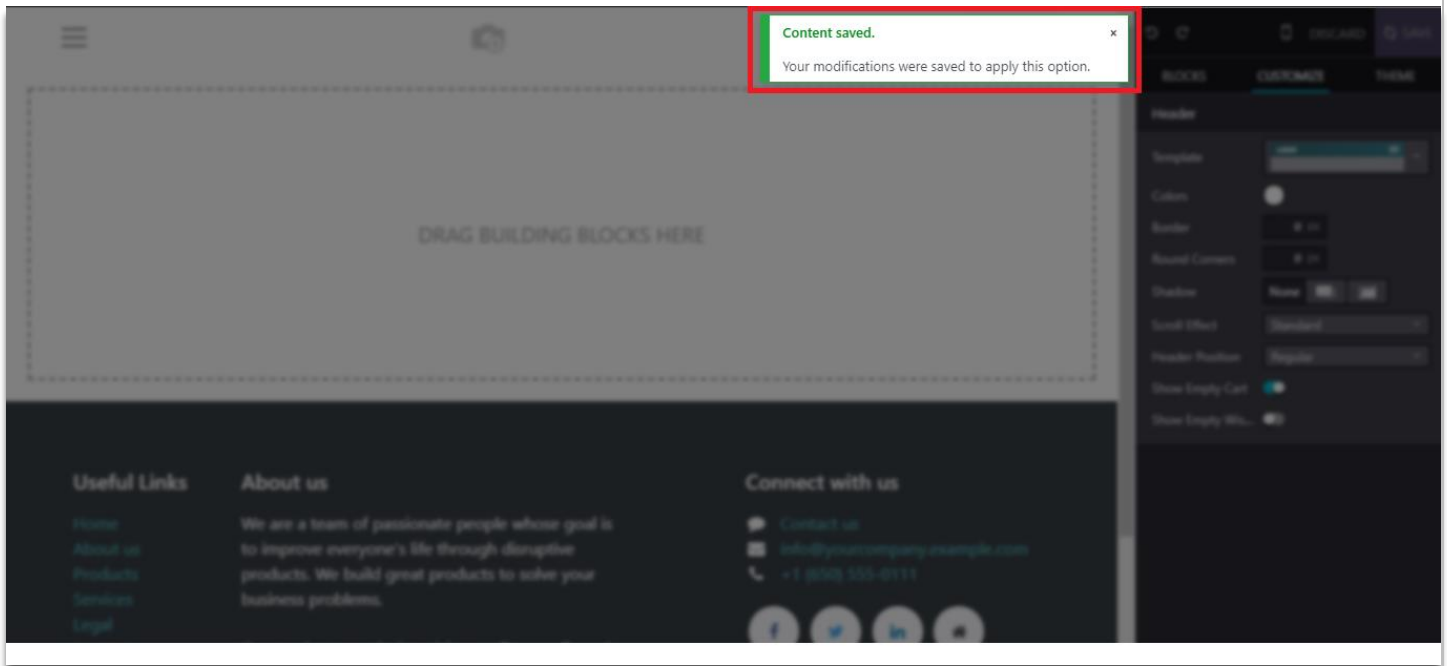

Header Customize Configuration

- Under the "Customize" tab, you can select the
- Theme Scita template for the Header.
- Clicking on the Template option, it will show different header styles to choose from.
- Mainly there are different header templates available in the theme Scita.
- Select the template that works best for your website structure.
- You can customize the header as per their requirement.
- After selecting any option, you will get the
- 'preview' as per the selection. By clicking on Save (top-right corner), the website changes will be done.

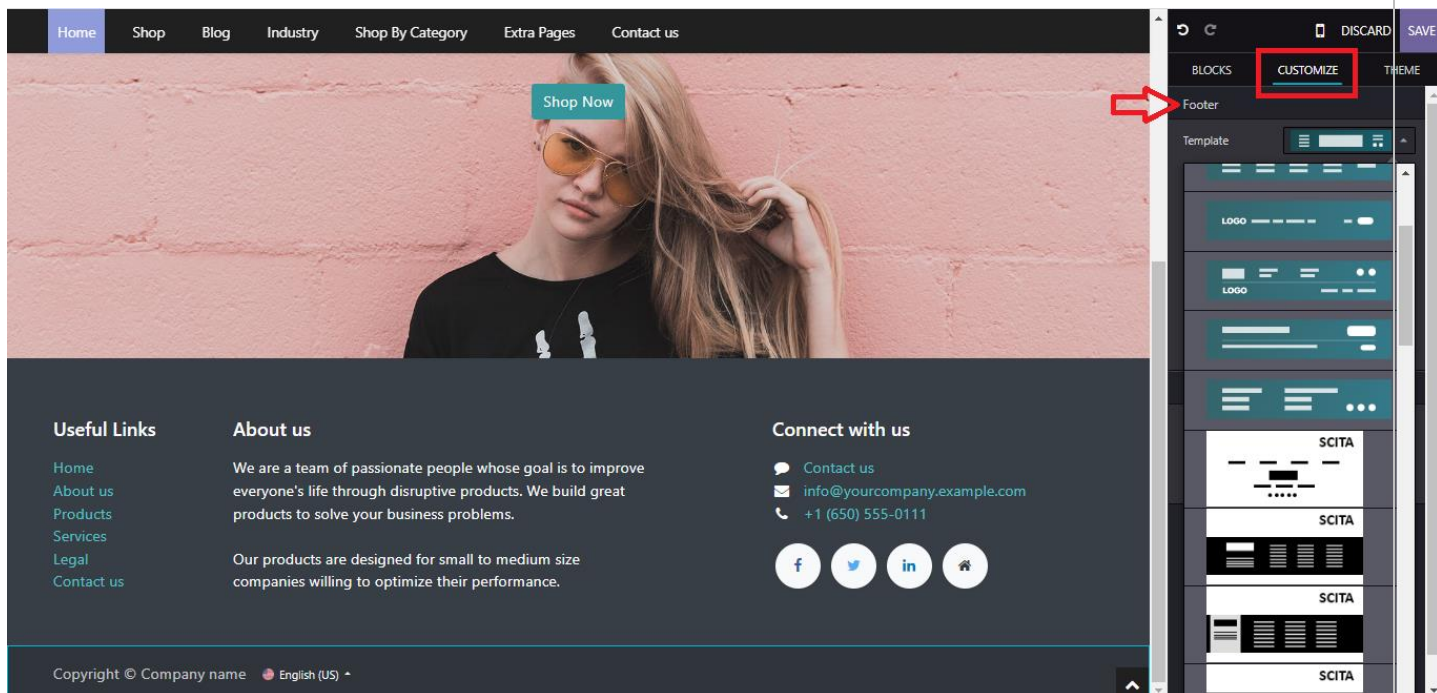

- When you select any 'template', you will get the confirmation message to load the webpage.

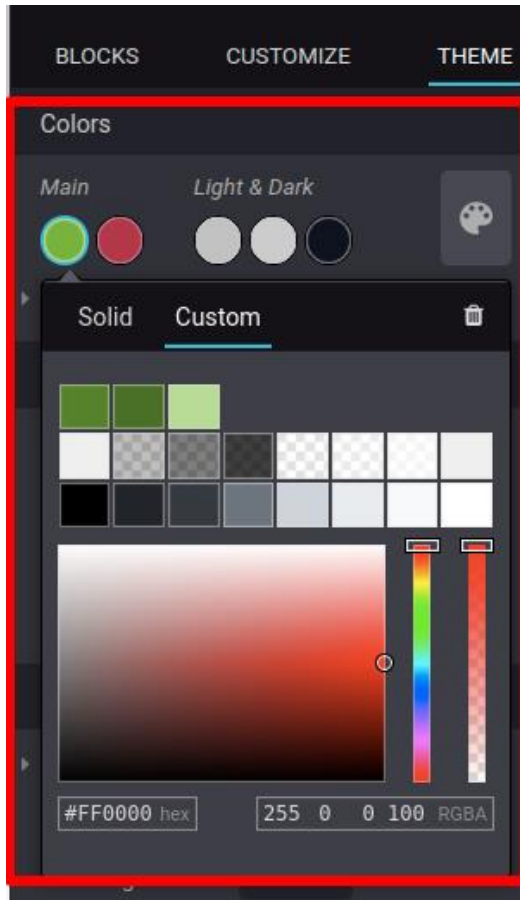

Footer Customize Configuration

- You can configure the footer by selecting the **Footer template** of "Theme Scita". You can customize the Footer options as per your website appearance. Once you select any template, it will ask for a confirmation message to reload the page as per the changes you made.

Theme & Page Layout customization

- You can customize the Theme options and Page layout of your industry-specific website (store).

Theme Colors

- Under 'Theme Colors', you can choose any color for your website appearance. By clicking on the 'colors' icon, it will show a color picker and in that color picker you can see the two tabs solid and custom which are seen in the below screenshot. We can apply primary as well as secondary color for theme itself.
- Once you choose any color, it will ask for a confirmation message to reload the webpage as per the changes and save the changes.

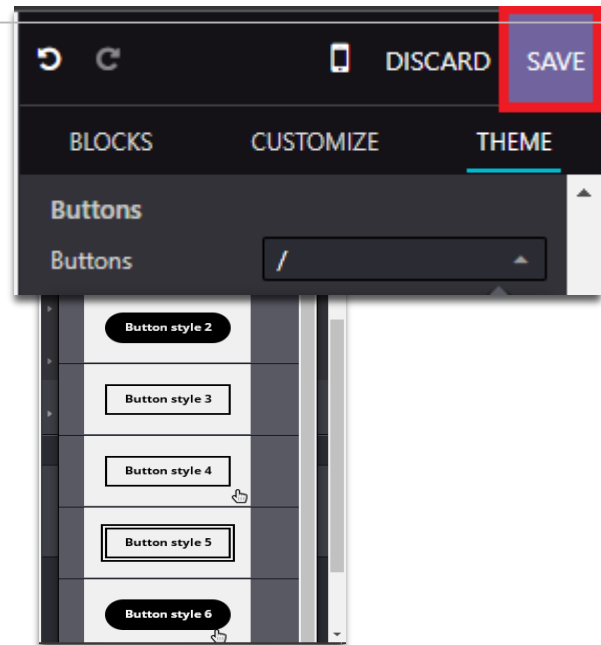

Theme Options

Page Layout

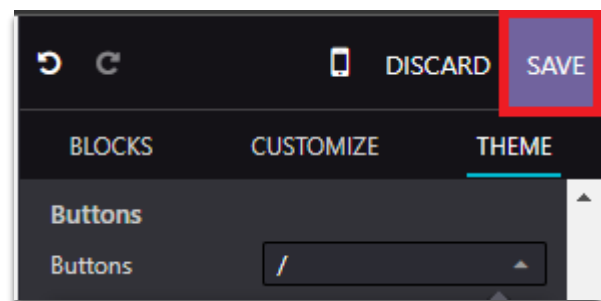

can select the **Background Image or Pattern** for your

Theme Options → Buttons

- Click on the Buttons drop-down option, it will show different button styles to select from.
- Mainly there are 8 different button styles available. Select the style that suits best for the website.
- By selecting any button style, you will get the confirmation message to reload the webpage for preview.

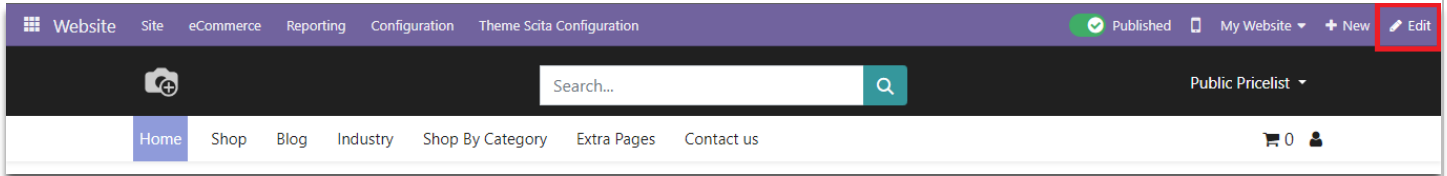

- You can set the Odoo default options like padding inputs & Website Settings.
- Once you customize the Header/Footer, Page Layout, and Theme options, click on the "Save" button to save the modifications.
- Now, you can add the "Snippets" of the **Theme Scita** to design the industry-specific website (Store).

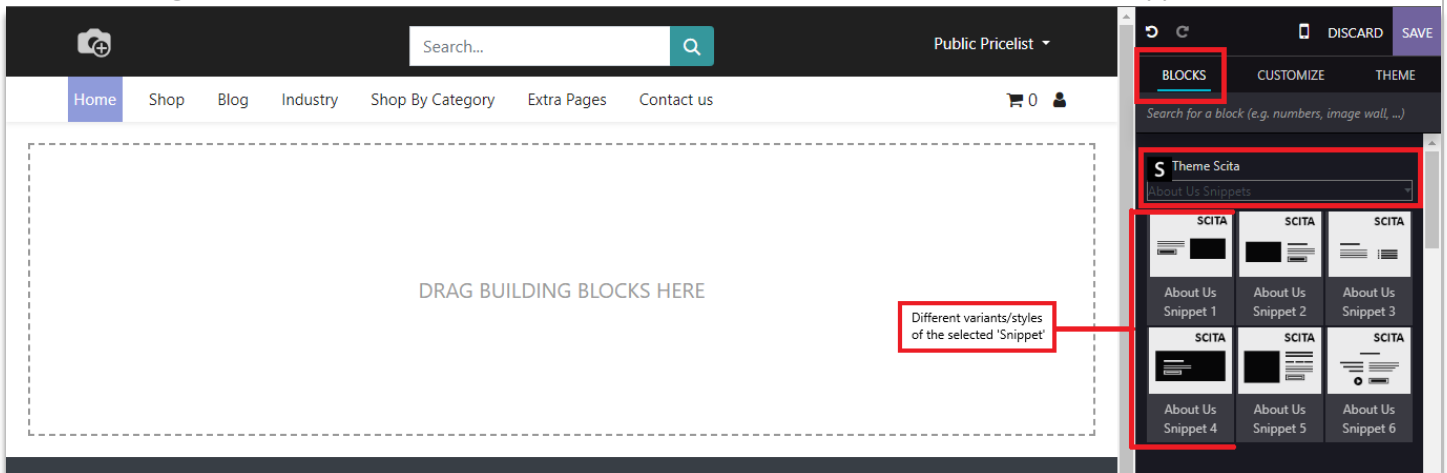

How to add Snippets?

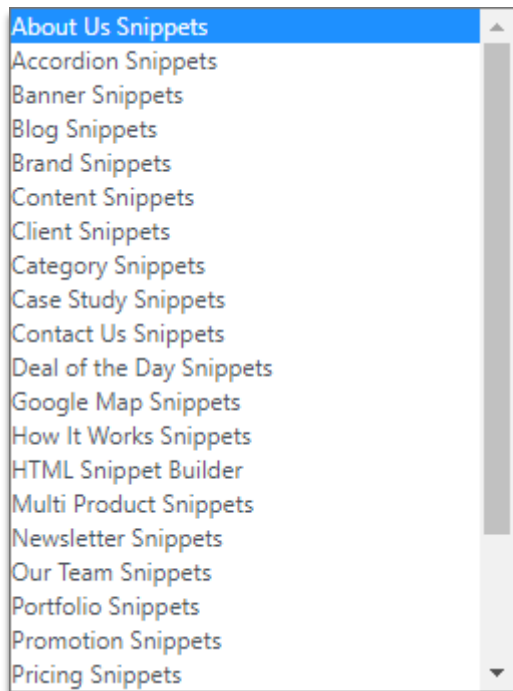

- Now, after theme customization, add the **Snippets** according to the website structure.
- To add Snippets, go to **Website** and click on the **Edit** button that is available in the top right corner.

- Clicking on the **Edit** button, a window on the left side with the name “Theme Scita” will appear.

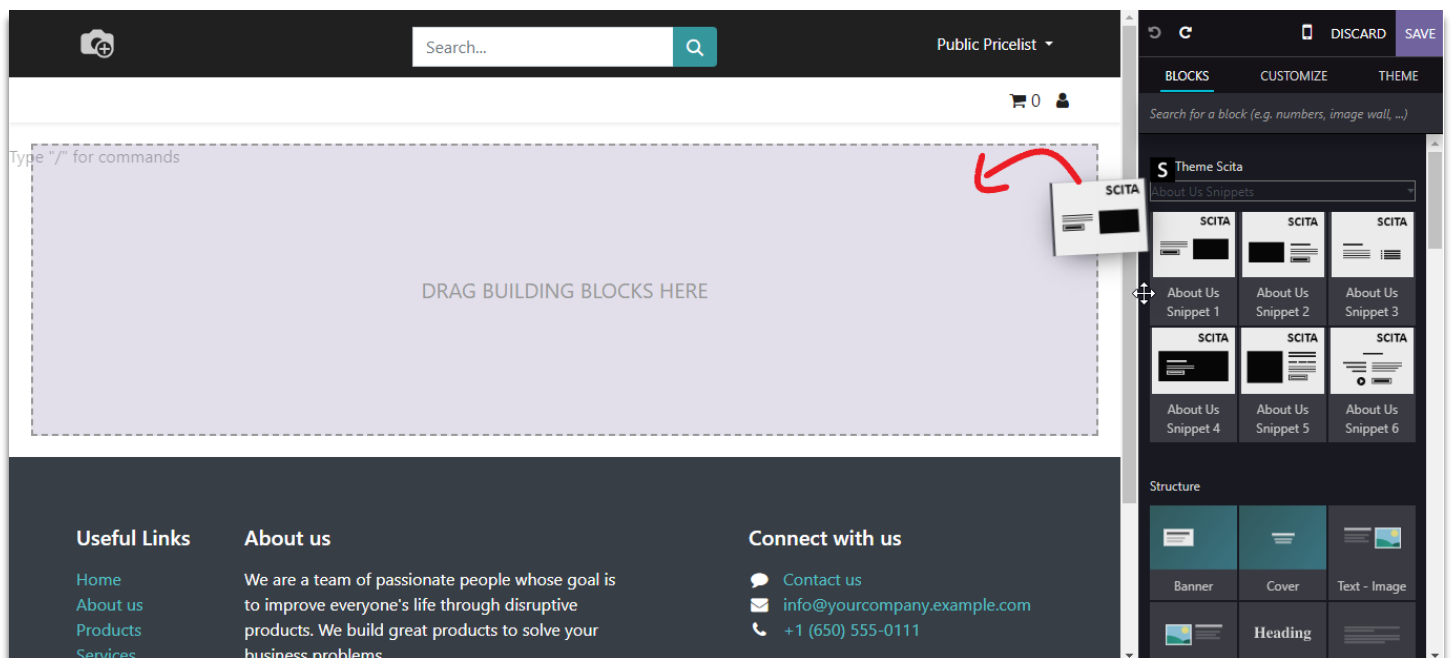

- You will find the **Snippets** drop-down option under the “Theme Scita” heading from where you can select a Snippet and drag and drop the snippet that you want to set on your website page.

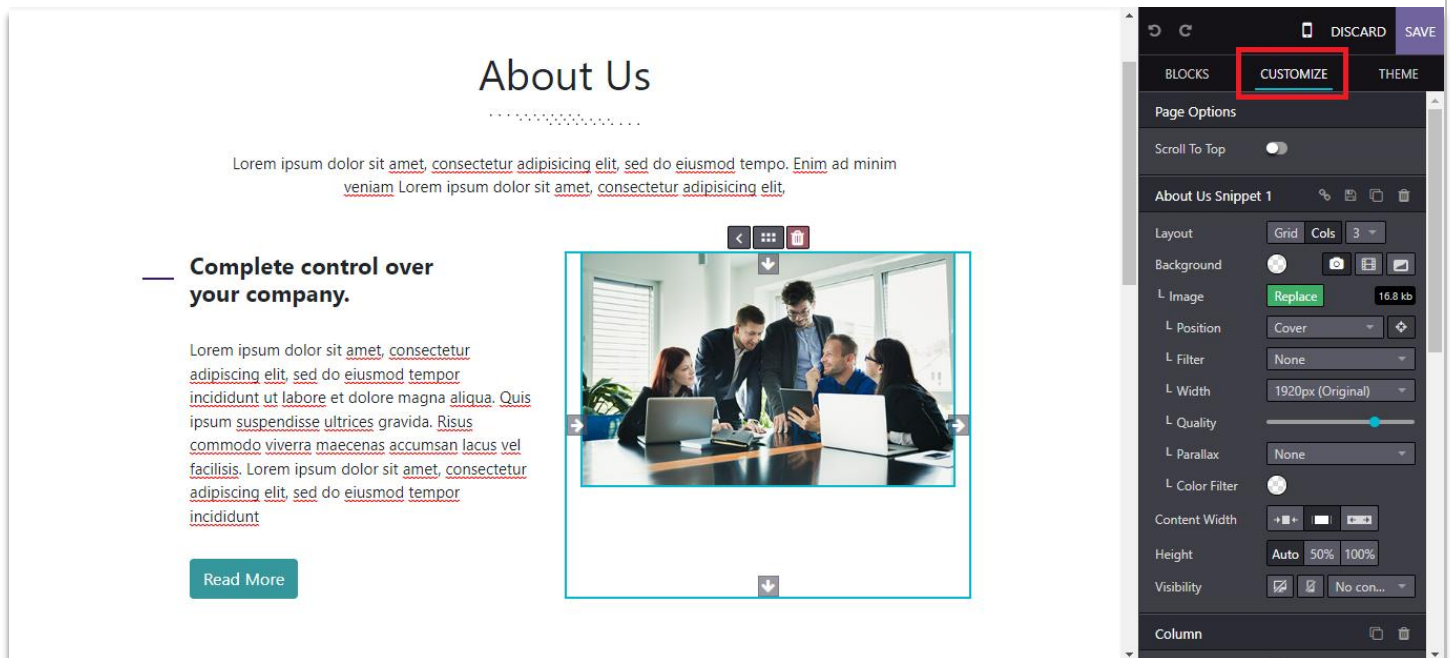

- You will get the 'alphabetical' list of Snippets.
- Select the required **Snippet** from the drop-down list.

- After selecting any Snippet, you will get its variants that you can place on the page simply **dragging and dropping**.

- As you drag and drop a Snippet, you will get a preview of the Snippet.

- You can edit the content of the Snippet. When you select the snippet, the snippet-related options will be enabled under the “Customize” tab.

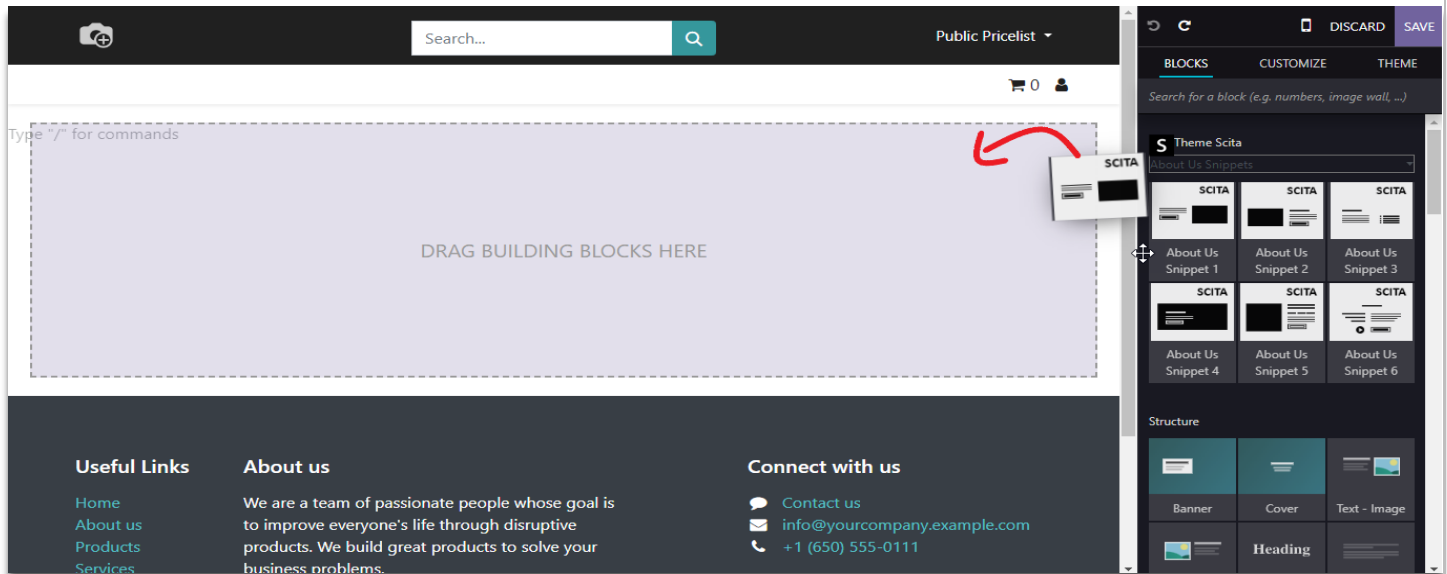

The screenshot displays a web editor interface. On the left, a preview of a web page titled "About Us" is shown. The page features a heading, a paragraph of placeholder text, a subheading "Complete control over your company.", another paragraph, and a "Read More" button. A central image shows a group of people in a meeting. On the right, a "CUSTOMIZE" panel is open, showing settings for "About Us Snippet 1". The panel includes options for Layout (Grid, Cols: 3), Background (Image, Replace, 16.8 kb), Position (Cover), Filter (None), Width (1920px (Original)), Quality (slider), Parallax (None), Color Filter, Content Width (Auto, 50%, 100%), Height (Auto, 50%, 100%), and Visibility (No con...). The "CUSTOMIZE" tab is highlighted with a red box.

- Once all required snippets are placed and edited, click on the Save button to save the changes made to the web page.
- You can customize and edit the Snippet as per your requirement or website structure.

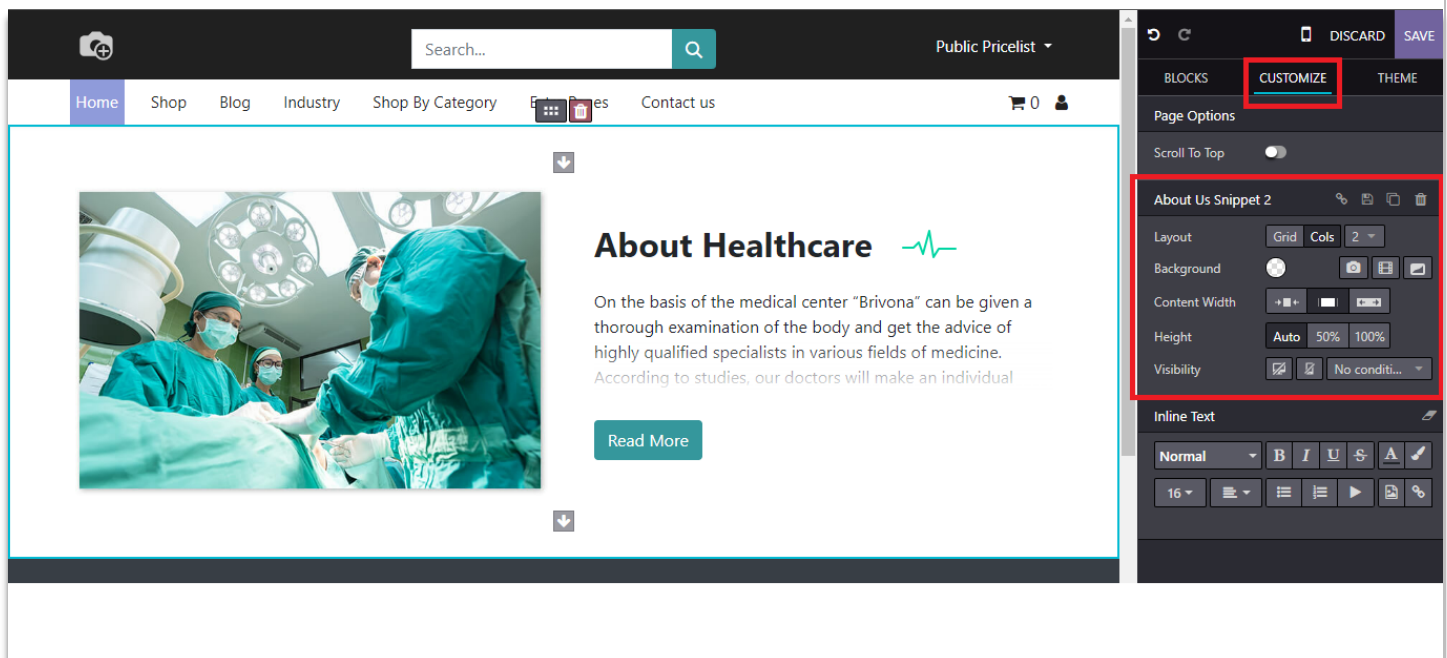

Theme Scita: List of Snippets

'About Us' Snippet

- For 'About Us', you will find 6 different options.

- Drag and drop any of the 6 snippets on the page where you want them.
- By selecting Snippet, you can customize the style elements like the Set No. of columns, Background, color, etc. and apply the text format from the 'Customize' tab.
- You can Move, Duplicate and Delete the snippet. You can also resize the snippet as per your need.

- You can customize every block of the snippet. You can change the image by clicking on the image that you want to change or remove. Along with the image, you can also add Text, Document, Pictogram, and Video to the snippet.
- You can edit the text caption, color, button's color, and button effects by double-clicking on them.

About Us 1

The screenshot shows a web page titled 'About Us 1' with a header containing 'Shop By Category', 'Pages', and 'Contact us'. The main content area features a large image of a person in a blue surgical gown, the heading 'About Healthcare' with a green heart icon, and a paragraph of text. A 'Read More' button is at the bottom. To the right, the 'CUSTOMIZE' panel is open, showing 'About Us Snippet 2' selected. The panel includes options for 'Page Options' (Scroll To Top), 'Layout' (Grid, Cols: 2), 'Background' (color swatches), 'Content Width' (Full, 1/2, 1/3), 'Height' (Auto, 50%, 100%), 'Visibility' (On, Off, No condition), and 'Inline Text' (font face, size, bold, italic, underline, strikethrough, link, unlink).

- When you select the 'Snippet', the snippet-related options will appear under the "Customize" tab. Here you will find the name of the selected Snippet as a header.
- You can 'duplicate' the container or block of the snippet by clicking on the Duplicate (copy) icon and 'delete' the Snippet by clicking on the Delete icon.

About Us 2

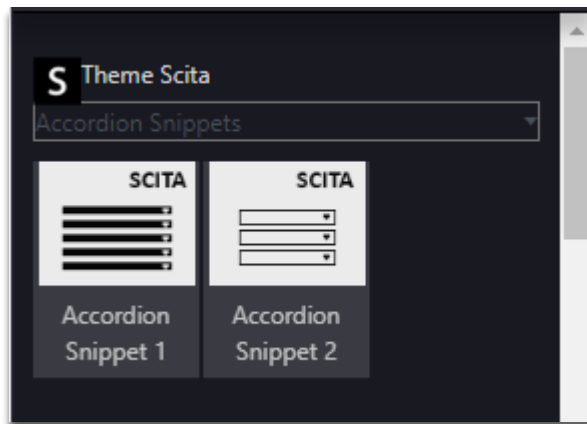

- You will get different editing options for the selected snippets. Edit as per your requirement.

The screenshot shows a web page titled 'About Us 2' with a header containing 'Shop By Category', 'Pages', and 'Contact us'. The main content area features a large image of two people in a meeting, the heading '40 years, we passionate about achieving better result for our client', and a paragraph of text. A 'Get in touch' button is at the bottom. To the right, the 'CUSTOMIZE' panel is open, showing 'About Us Snippet...' selected. The panel includes options for 'Page Options' (Scroll To Top), 'Layout' (Grid, Cols: 2), 'Background' (color swatches), 'Content Width' (Full, 1/2, 1/3), 'Height' (Auto, 50%, 100%), 'Visibility' (On, Off, No condition), and 'Inline Text' (font face, size, bold, italic, underline, strikethrough, link, unlink).

- You can also set the 'Tab' in the snippet and edit it. You can set the background color of the whole Snippet and you can also edit and customized any block of Snippet.

Adding an 'Accordion' Snippet

- There are **two** variants for the 'Accordion' snippet.

- Drag and drop any of the 2 snippets on the page.

Accordion Type 1

Frequently Ask Question

Does hudly work with car?

Lorem Ipsum is simply dummy text of the printing and typesetting industry1.

Does hudly work with my phone?

Lorem Ipsum is simply dummy text?

Accordion Type 2

Frequently Ask Question

Does hudly work with car?

Lorem Ipsum is simply dummy text of the printing and typesetting industry1.

Does hudly work with my phone?

Lorem Ipsum is simply dummy text?

Lorem Ipsum is simply dummy text?

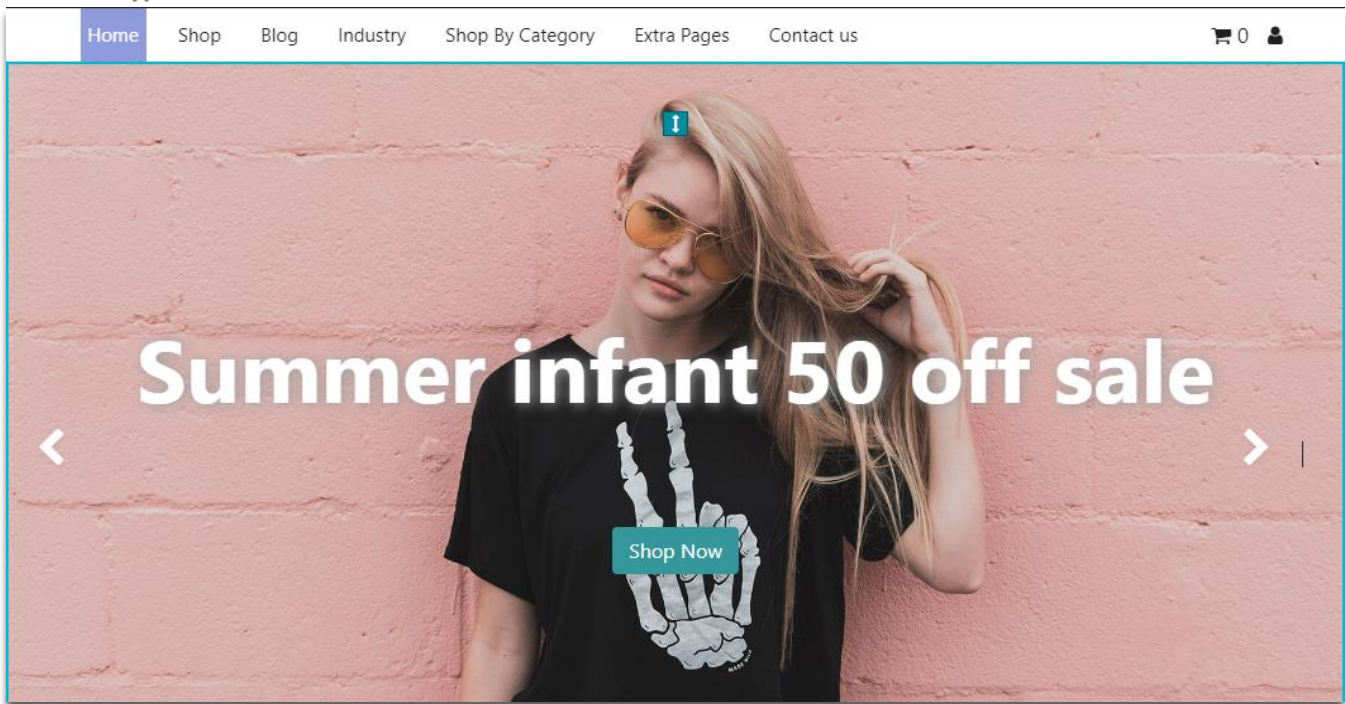

- After selecting the accordion snippet, you can easily customize the elements like text.

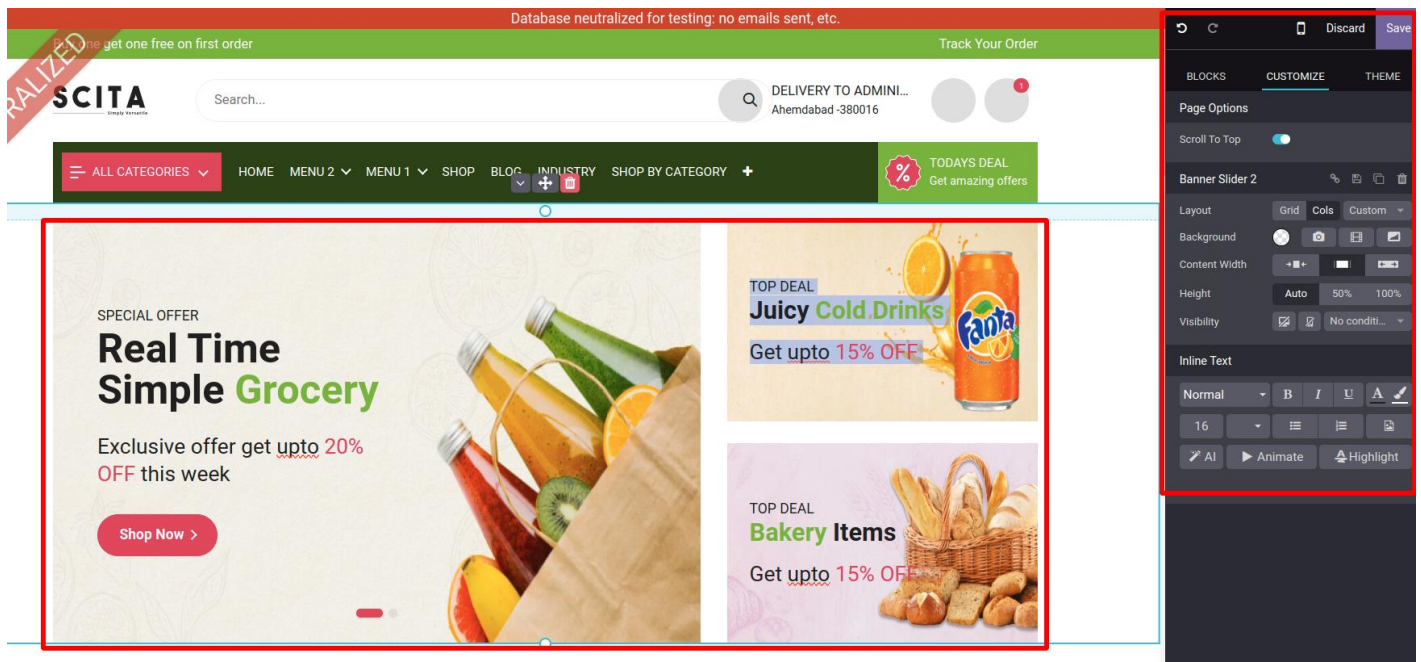

Adding 'Banner Type' Snippet

- There are 11 different snippets for 'Banner Type' along with a video banner, Drag and drop any of the 11 snippets.
- By selecting Snippet, you can customize the style elements: Set No. of columns, Background, its
- Color, etc. and apply the text format from the 'Customize' tab.

Banner Type 1

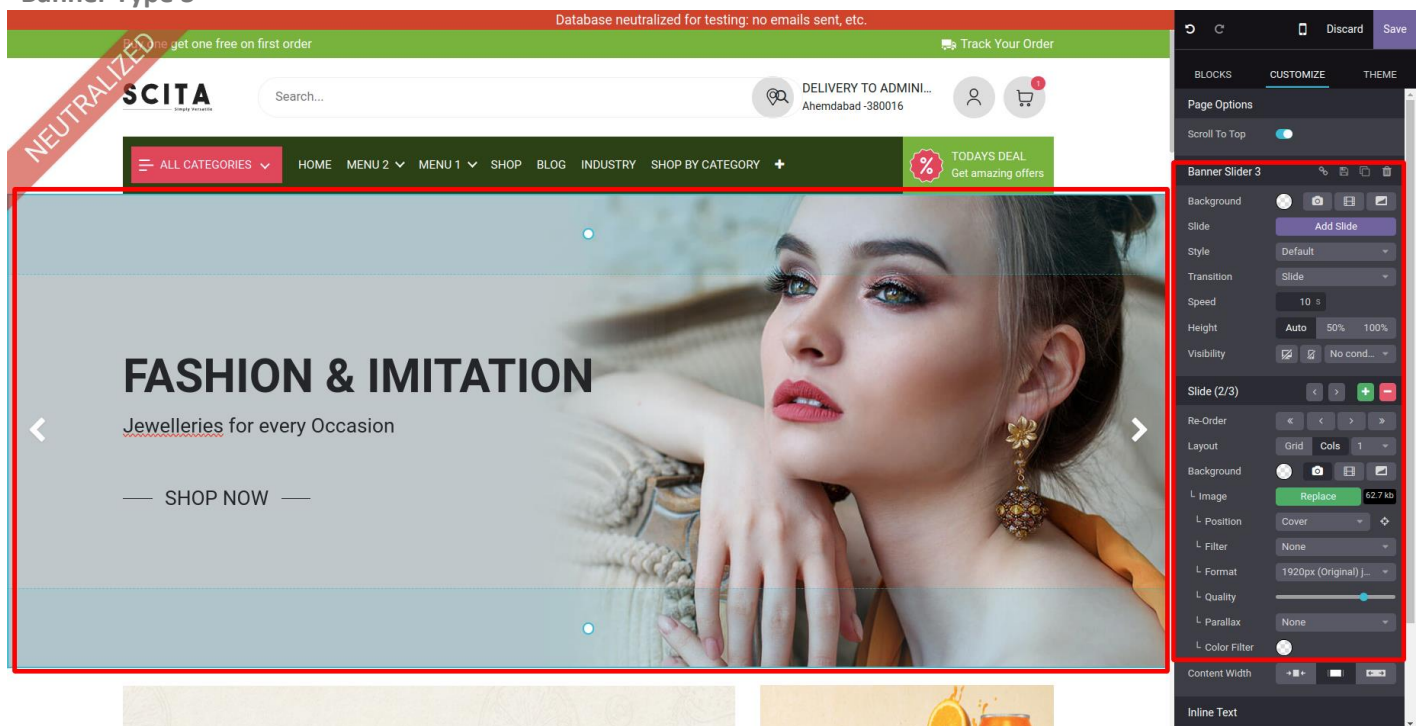

Banner Type 2

- You can apply the slide effects, and speed and add more slides with the description and images.
- You can also edit the text on the button, its background color, and the style of a button by double-clicking on it.

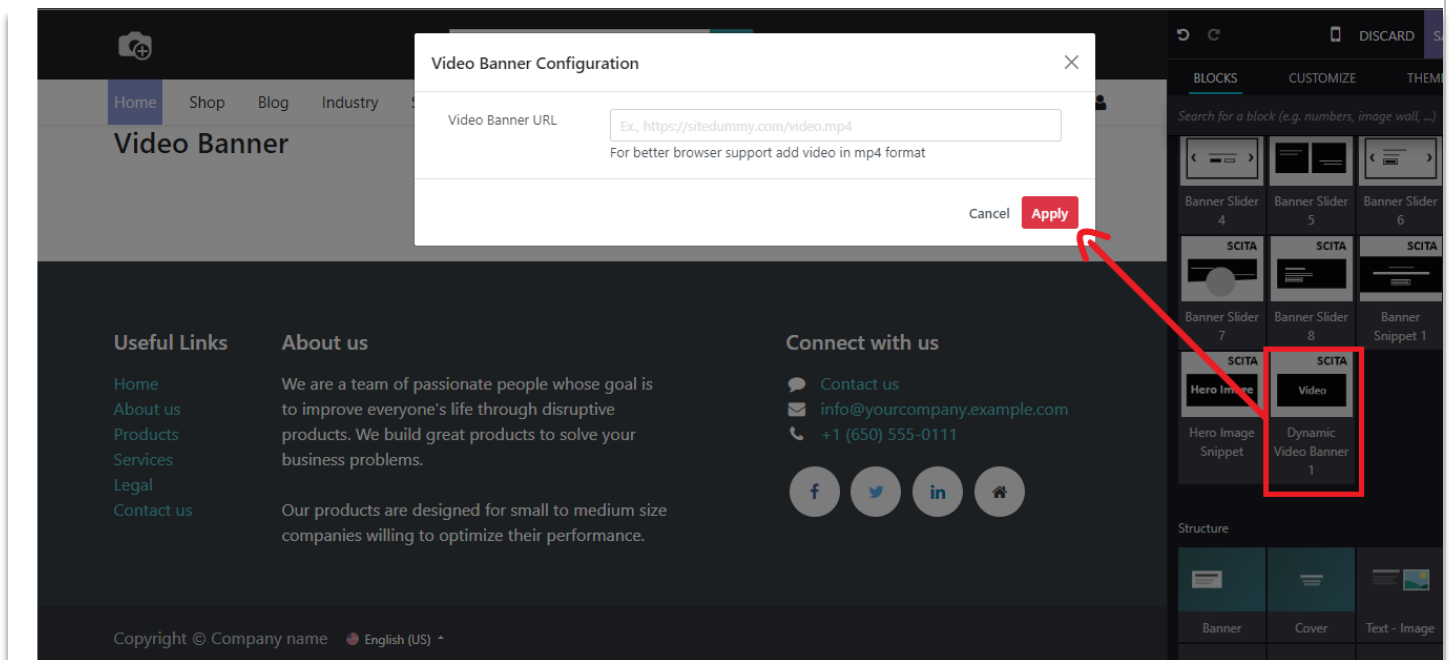

Banner Type 3

- You can set the background image and button text by double-clicking on it.

Video Banner Snippet

- You can also display the **Video Banner** under 'Banner Snippet' in Theme Scita.

- By dragging & drop Dynamic Video Banner 1, a popup will appear named Video Banner Configuration.
- Insert the Video URL and Mp4 format will be preferable for better browser support.
- After inserting Video Banner URL, click on Apply button and Save the website changes.

Website View

- Banner video will automatically be played when your customer browses your store.

'Blog' Snippet

Back End Configuration

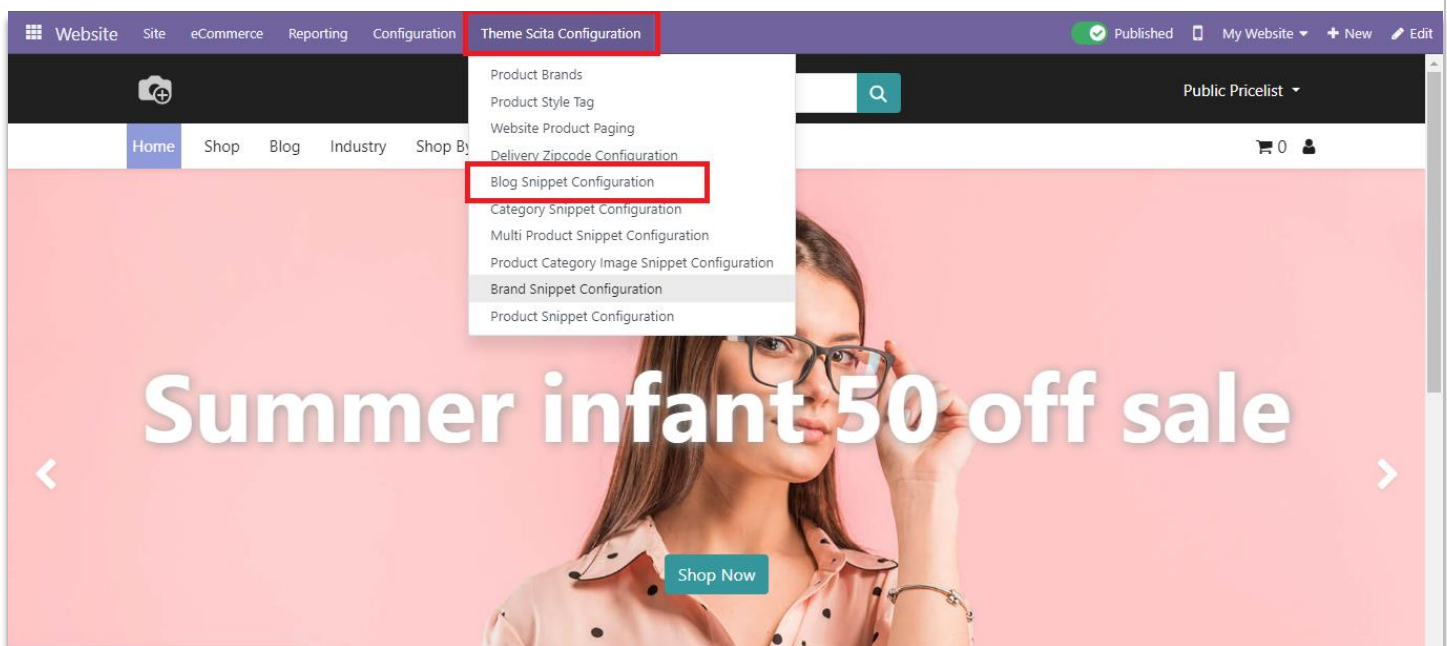

- To use this snippet, first you need to configure the same from the backend admin section.
- For that, go to WEBSITE  Website.
- By clicking on Website, you will find the dashboard with the header menu section.
- To configure the Blog snippet, first, you must insert a Blog post with its Category and Tags if required.

 Website Site eCommerce Reporting Configuration Theme Scita Configuration

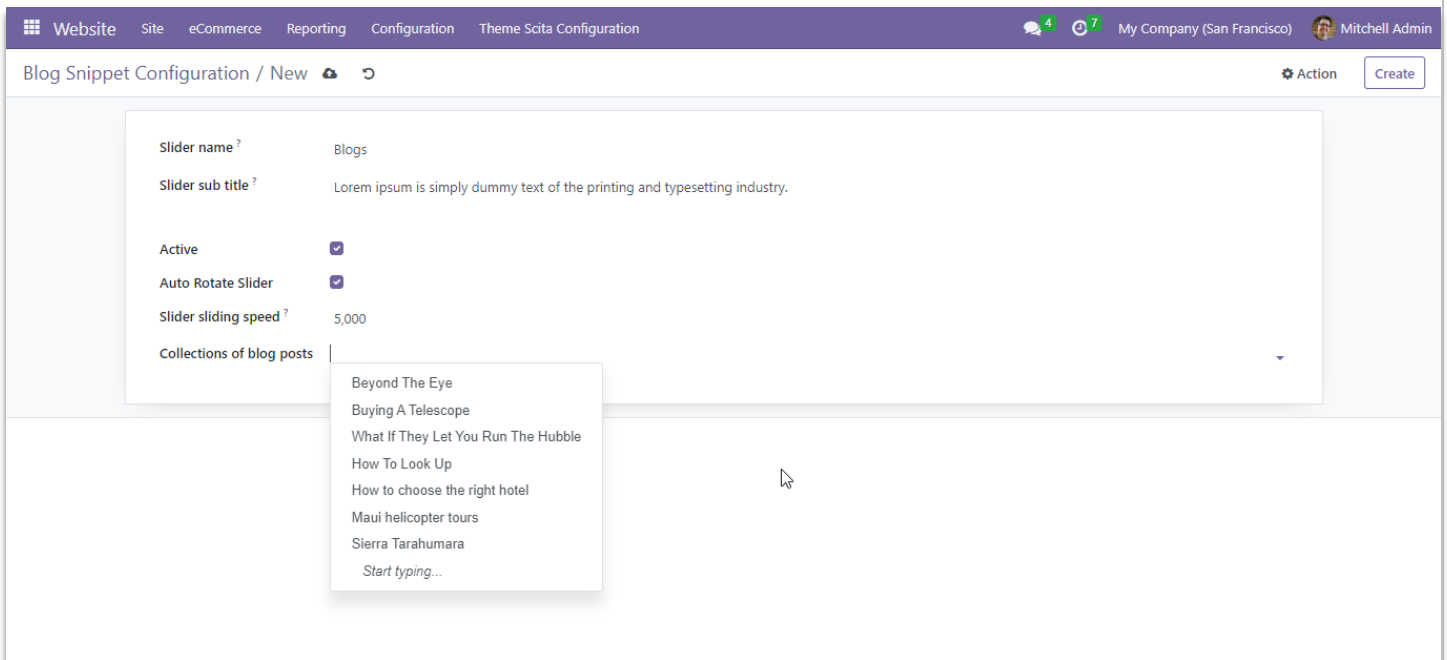

- To create a Blog post, click on **Blogs** from the header Menu and create a Blog with the required details.
Note: Once the blog is created you should 'publish' it on the website.

- Now, go to **Theme Scita Configuration** → **Blog Slider Configuration** to configure the **Blog snippet**.

- From here, you can insert a 'Blog Slider' which you will need to select during Blog snippet drag &drop.

- Now, create a new **Blog Slider** by inserting the required details and selecting the **Blog Post** from the 'Collections of Blog posts dropdown list.

The screenshot shows a web application interface for configuring a new Blog Slider. The top navigation bar includes links for Website, Site, eCommerce, Reporting, Configuration, and Theme Scita Configuration. The user is logged in as Mitchell Admin. The main heading is 'Blog Snippet Configuration / New'. The form contains the following fields:

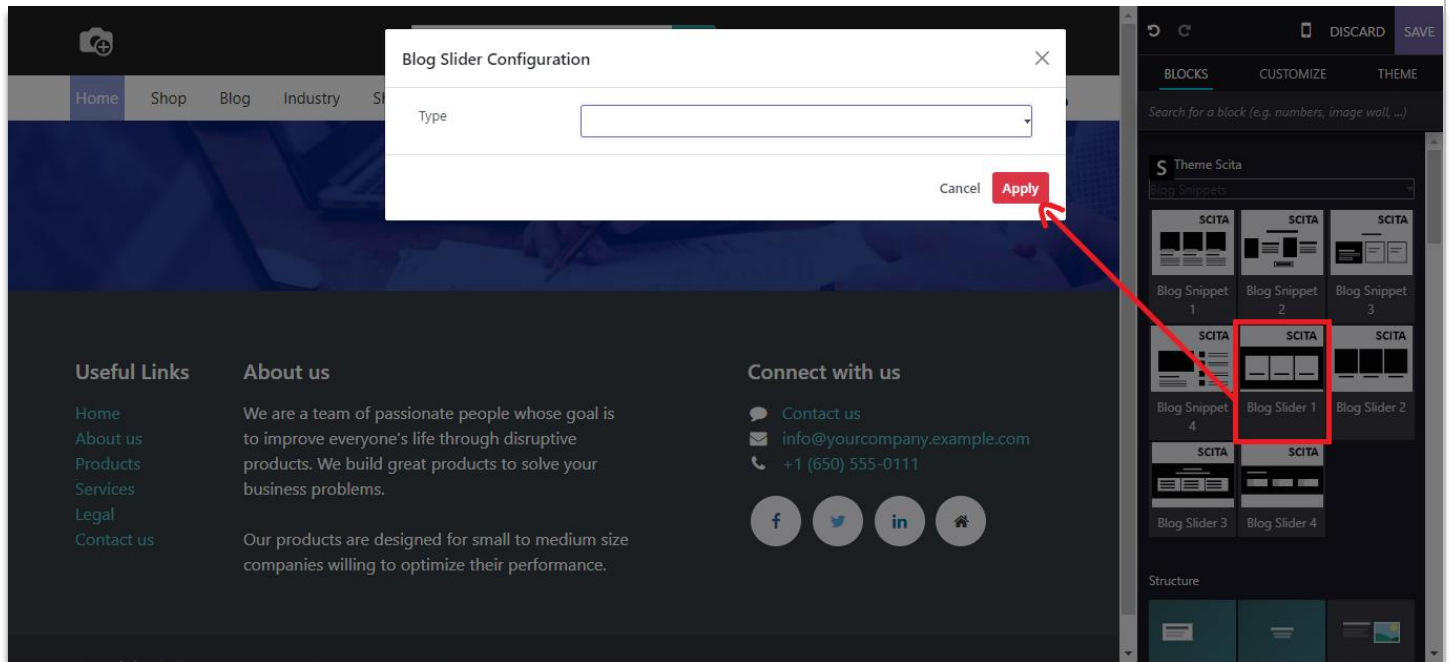

- Slider name: Blogs
- Slider sub title: Lorem ipsum is simply dummy text of the printing and typesetting industry.
- Active: ☒
- Auto Rotate Slider: ☒
- Slider sliding speed: 5,000
- Collections of blog posts: A dropdown menu is open, displaying a list of blog post titles: Beyond The Eye, Buying A Telescope, What If They Let You Run The Hubble, How To Look Up, How to choose the right hotel, Maui helicopter tours, Sierra Tarahumara, and Start typing...

Note: You will get only those Blog posts from the drop-down list which are published and live.

- Now, you can use this snippet by switching to the website.
- Go to Website -> Click on the Edit button available in the top right corner. By clicking on that, a snippet panel shows on the left side of the window.

Website view (Front End view)

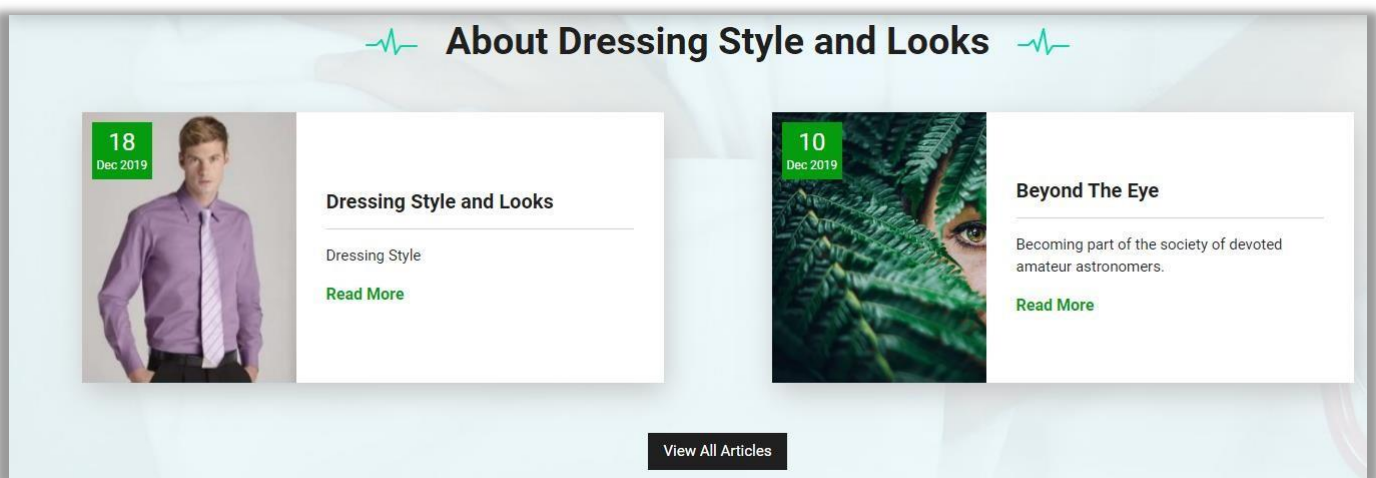

- Now, go to the Theme SCITA section and select the **Blog** snippet from the drop-down list.
- There are **8 different snippets** for 'Blog slider'. Drag and drop any of the 8 snippets.

- As you drag and drop this snippet, a pop-up will be shown named “Blog Slider Configuration” to select a ‘Blog type’ which you want to display on the website.
- After selecting a Blog Type, you must **Save** the changes.

'Category Slider' Snippet

Backend Configuration

- There are 4 different types of Category Sliders: 2 Banners and 2 Sliders.
- To use the Sliders, first you must configure the 'Category Sliders' from the backend configuration.
- Before Category Slider Configuration, you must add the Categories from WEBSITE > Website > Configuration > eCommerce Categories.
- Now, for the Category Slider Configuration, go to WEBSITE > Website > Theme Scita Configuration > Category Slider Configuration.

- After clicking on 'Category Slider Configuration', the Category Slider page will be redirected.
- From here, you can edit available categories and create a new Category Slider.

- Insert desired 'Slider Name' and select required Categories from the Collection of Category drop-down option.
- The categories which are selected in the 'Collection of category' option will get displayed on
- "Category Slider" Snippet (Website view).
- Now you can use the 'Category Slider' snippet by switching to the website.

Website view (Front End view)

- Now, go to the Theme SCITA section and select the Category slider snippet from the drop-down list.
- There are 6 different types of 'Category' snippets and 3 category sliders. Drag and drop any of the 4 snippets.

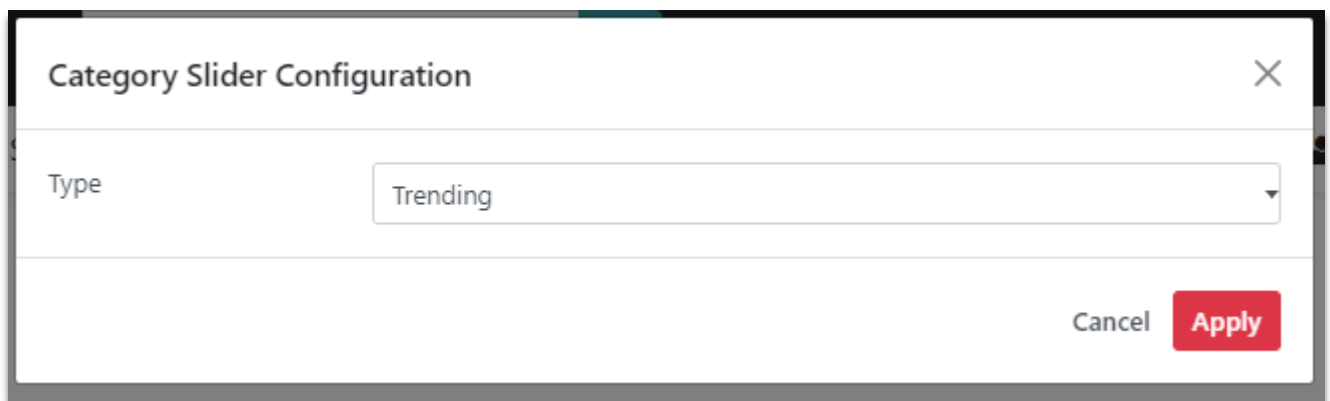

Category Banner

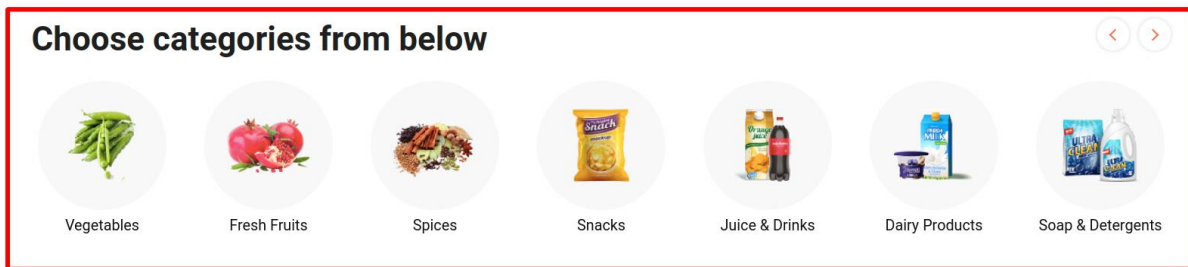

- To display the Category Banner on the website, simply drag & drop it.

Category Slider

- Now, if you drag & drop the 'Category Slider', it will show a pop-up from where you can select the 'Category Slider' Type which you want to display on the website.

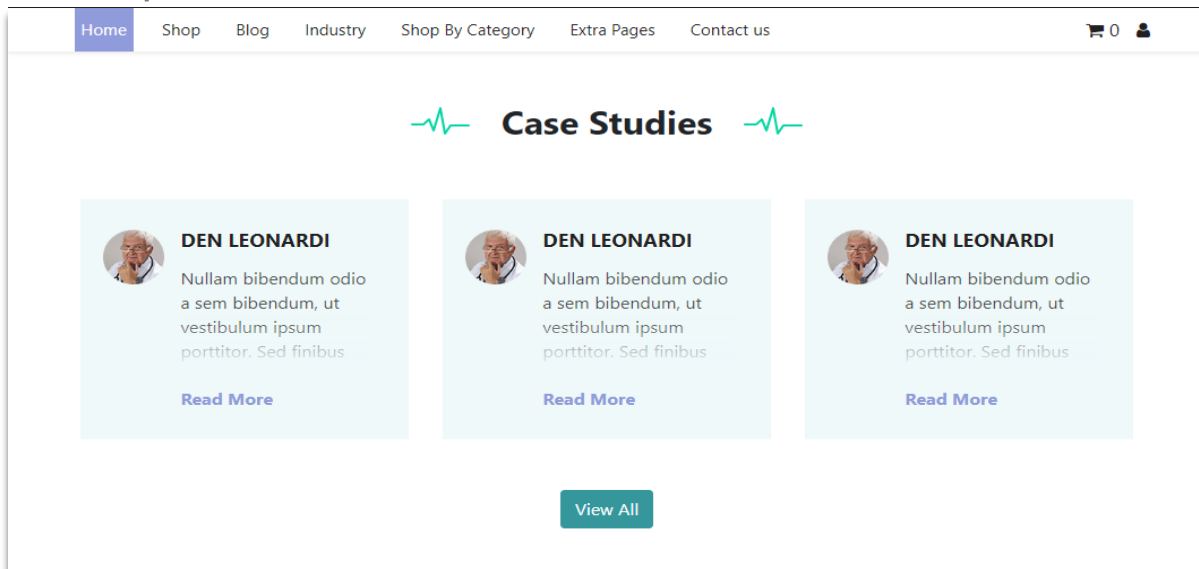

- After clicking on the Apply button and saving the website changes, you will see the Trending slider you have created on the website.

'Case Study' Snippet

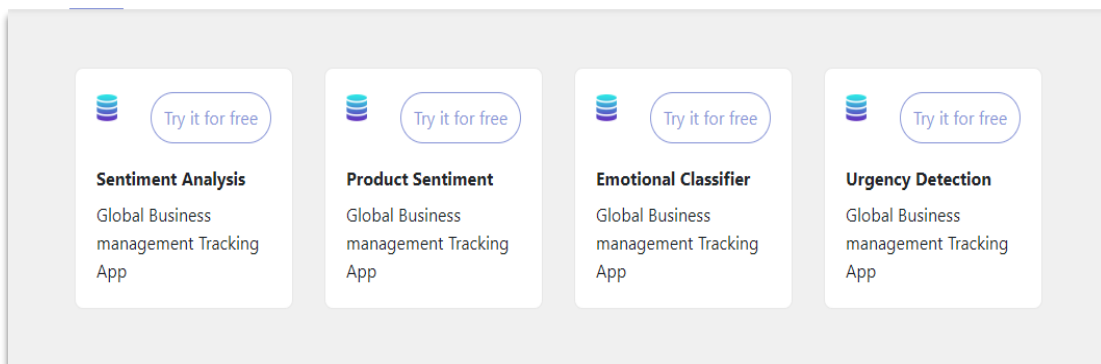

- There are 3 different variants for the 'Case Study' snippet. Drag and drop any of the 3 snippets.

Case Study 1

- You can edit the details of any content and column from the 'Customize' tab.

Case Study 2

- You can edit the icons, buttons, and text from the block of any content of the Snippet from the 'Customize' tab.

'Contact Us Snippet

- There are 6 different types of 'Contact Us' snippets. Drag and drop any of the 6 types.

- Drag & drop the Timer on the Deal of the Day snippet, and a popup will appear to insert the details of the Timer. You should insert the details like Date & Time as per your offer duration and a message after completion of the deal.

Deal of The Day 1

- After saving the details, the webpage will be shown with the timer of the offer.

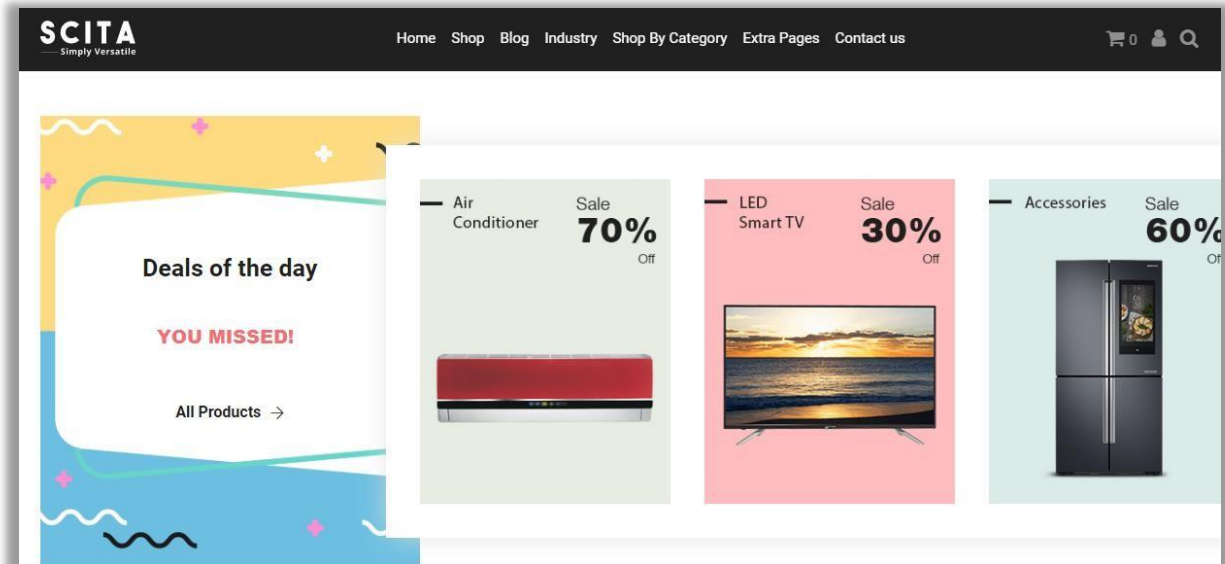

Deal of The Day 2

The banner features the SCITA logo (Simply Versatile) in the top left. The navigation menu includes Home, Shop, Blog, Industry, Shop By Category, Extra Pages, and Contact us. The main heading is "Exclusive Deals End in". Below it, a text line reads: "Discover the best selling products of T90 stores. All the products are listed weekly in store, helping customers capture products are best sellers." A red-bordered box contains a countdown timer showing 01 DAYS, 07 HOURS, 16 MINS, and 37 SECS. Below the timer is a "SHOP NOW →" button. The background is a light pink with a close-up of a pink knitted fabric and a gold chain with white beads on the left, and pink rose petals at the bottom.

Deal of The Day 3

- After completion of the offer, the customer will get the message you inserted in Sale Over Message.

The banner features the SCITA logo (Simply Versatile) in the top left. The navigation menu includes Home, Shop, Blog, Industry, Shop By Category, Extra Pages, and Contact us. On the right side of the header, there are icons for a shopping cart, a user profile, and a search magnifying glass. The main content area is divided into three vertical panels. The left panel has a colorful background with wavy lines and a white box containing the text "Deals of the day", "YOU MISSED!", and "All Products →". The middle panel has a light green background and features an "Air Conditioner" with a "Sale 70% Off" and an image of a red air conditioner. The right panel has a light blue background and features "Accessories" with a "Sale 60% Off" and an image of a black refrigerator.

- By clicking on All Products, the customer can check all the products which are under the 'Deals of the day offer.

- To set the product under the 'Deal of the Day offer, go to the **eCommerce** → **Products** → **Product detail page** → **Sales**
→ **Enable the Available for deal of the day option** and save the changes.

How It Works 3

'Multi Product Slider' Snippet

Backend Configuration

- To use this snippet, first you need to configure the 'Multi Product Slider' configuration in the backend.
- For that, go to Sales > Slider Configuration > Multi Product Slider.

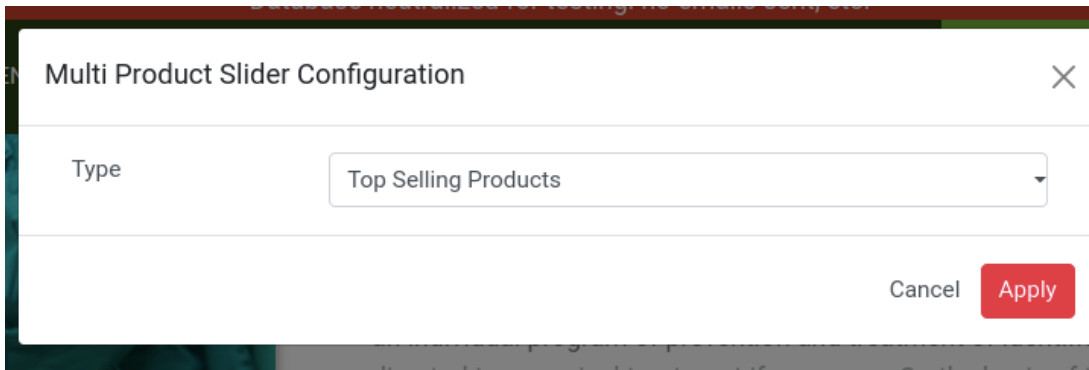

- You need to insert 'No. of Product Collection' to display on the website. You need to select multiple products for the collection. You can also select Auto Rotate Slider option with the slider's time duration.

A screenshot of the 'Multi Product Snippet Configuration / New' form in the backend. The form has several sections: 'Slider name' (set to 'Trending'), 'Active' (checked), 'Show Product Rating' (checked), 'SLIDER CONFIGURATION' (with 'Auto Rotate Slider' checked and 'Slider sliding speed' set to 5,000), and 'COLLECTION CONFIGURATION'. Under 'COLLECTION CONFIGURATION', there are two collections. The first collection is named 'First collection' and contains four products: '[FURN_5555] Cable Management ...', '[FURN_7800] Desk Combination', '[E-COM11] Cabinet with Doors', and '[FURN_6666] Acoustic Bloc Screens'. The second collection is named 'Second collection' and contains three products: '[FURN_1118] Corner Desk Left Sit', 'Chair floor protection', and '[E-COM11] Cabinet with Doors'. The form has 'Action' and 'Create' buttons at the top right.

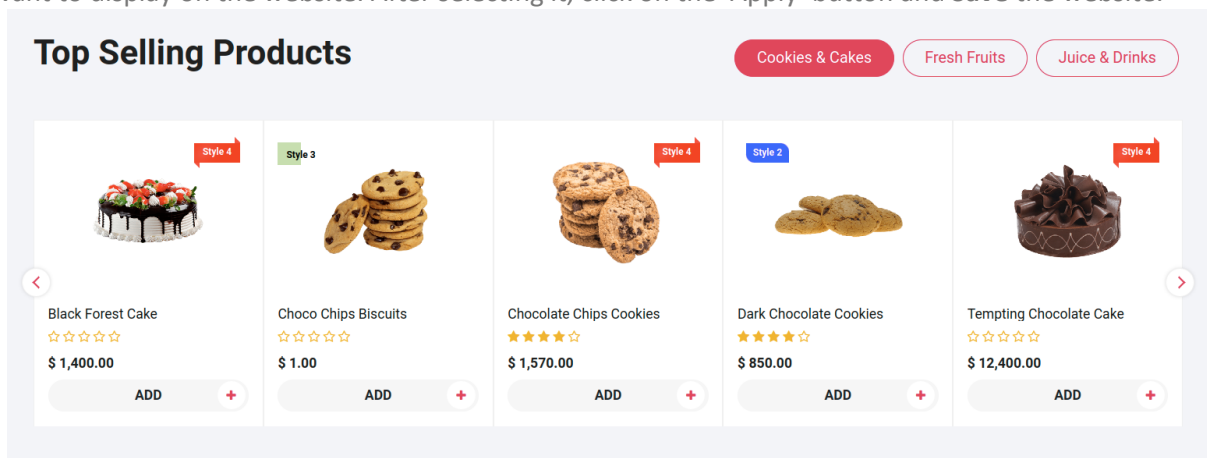

- After saving the details, use the 'Multi Product Slider' snippet by switching to the website.

Website view (Front End view)

- Now, go to the Theme SCITA section and select the Multi Product Slider snippet from the drop-down list.
- There are 2 different variants for the "Multi Product Slider" snippet. Drag and drop any of the 2 snippets.

- As you drag and drop the snippet, a pop-up will appear to select a **type** of 'Multi Product Category' which you want to display on the website. After selecting it, click on the 'Apply' button and **Save** the website.

- You can see the Multi Product Slider with three product collections Cookies and Fresh fruits and Juices and drinks which is configured in Backend.

'Our Team Variant' Snippet

Backend Configuration

- To use this snippet, first you need to configure it in the in-backend admin section.
- For that, go to Employee > Employees and open any customer details by clicking on 'Edit' button.
- In the 'employee details' page, enable the Enable to Make the employee visible in the snippet feature. After enabling, add all the required details of their social media accounts.

The screenshot shows the Odoo web interface for an employee's details. The breadcrumb trail is 'Employees / Abigail Peterson'. The page title is 'Abigail Peterson' with the role 'Consultant'. The 'Slider Configuration' tab is active, showing a table of social media accounts and a checkbox to 'Enable to make the employee visible in snippet'. The checkbox is checked. The table lists Twitter, Facebook, and LinkedIn accounts with their respective URLs. A 'Short description about employee' field is also present.

Field	Value

Configure Categories and Subcategories for Mega Menu

To create a Category:

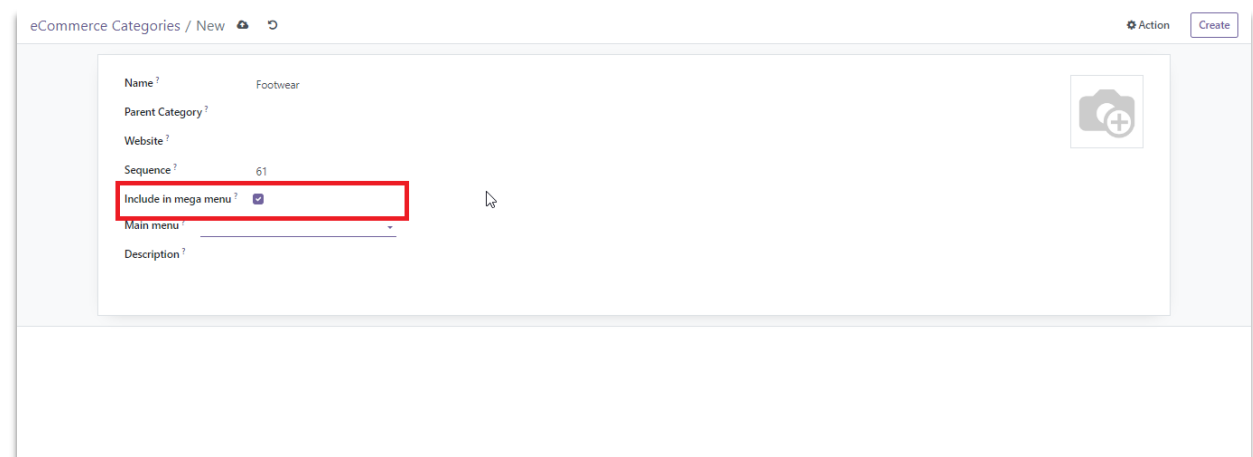

- Go to WEBSITE Menu > Website > eCommerce > eCommerce category. Now click on
- 'Create' button to create a product category.
- By entering the name the of category, you must check the Include in Mega Menu checkbox.
- You must select Main Menu to display this category.
- To create a category, set the main menu as a menu based on your requirement.
- Give sequence numbers to decide the sequence.

The screenshot shows the 'eCommerce Categories / New' form. The 'Name' field is filled with 'Footwear'. The 'Parent Category' field is empty. The 'Website' field is empty. The 'Sequence' field is filled with '61'. The 'Include in mega menu' checkbox is checked and highlighted with a red rectangle. The 'Main menu' field is empty. The 'Description' field is empty. There is a 'Create' button in the top right corner.

To create Subcategory:

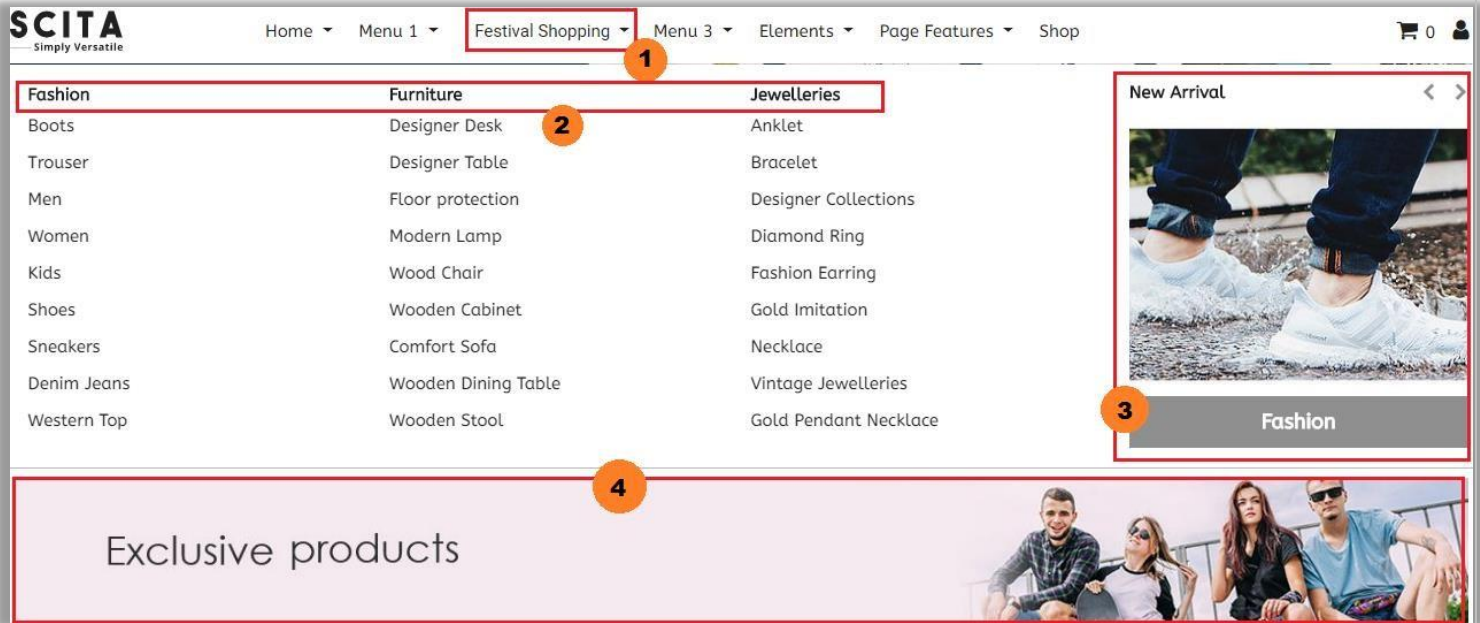

- Enter the name of the category and choose a Parent Category name in which you want to create a subcategory.
- You can also give a sequence number to decide the sequence.

The screenshot shows the 'eCommerce Categories / New' form. The 'Name' field is filled with 'Footwear'. The 'Parent Category' field is empty. The 'Website' field is empty. The 'Sequence' field is filled with '61'. The 'Include in mega menu' checkbox is checked and highlighted with a red rectangle. The 'Main menu' field is empty. The 'Description' field is empty. There is a 'Create' button in the top right corner.

Note: If you enter the category name and do not select the parent category then by default that category will also be included in the mega menu. In such a case, that category will be a parent category by default.

Mega Menu view (Frontend View)

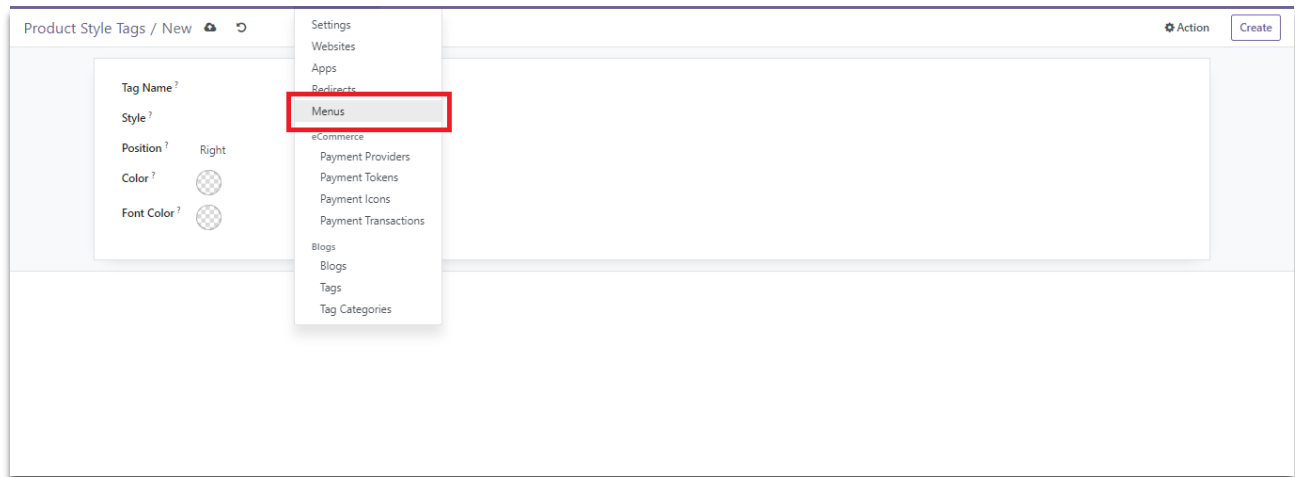

- The mega menu named “Festival Shopping” can be seen.
- The three columns of Parent Category as configured: Fashion, Furniture, and Jewelleries
- If the Category Slider is enabled with related details that can be seen as per the selection of the position. Here in the category slider, the Parent Category slides will be displayed. (3 sliders)
- If the footer is enabled with the images and details that can be seen in the footer area.

Configuring 'Shop Page' Features

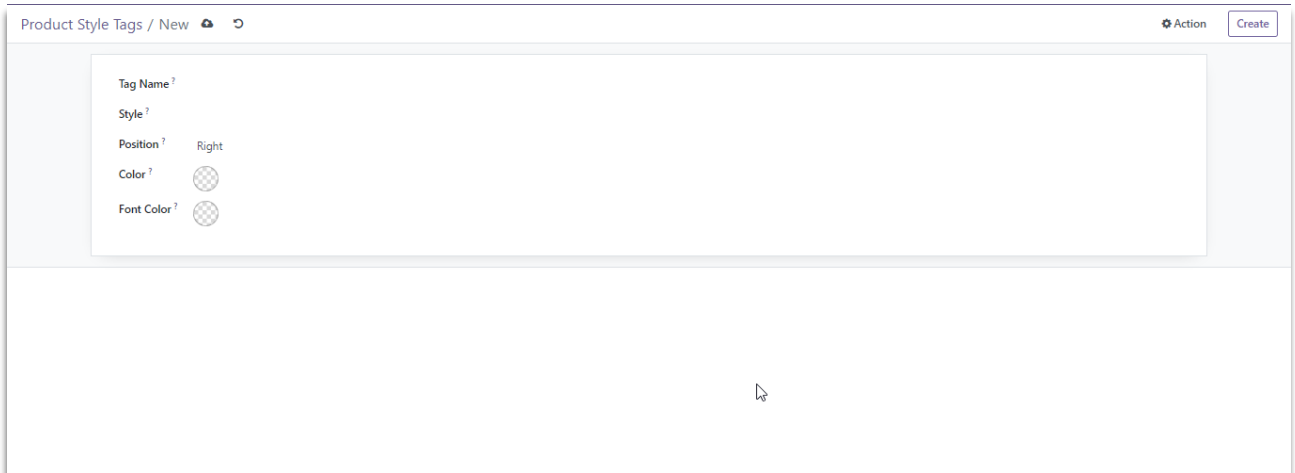

Configure 'Sales Ribbon'

Backend Configuration

- For 'Sales Ribbon', you must configure it in backend then only records can be displayed on the front.
- To configure go to WEBSITE  Website  Theme Scita Configuration  Product Style Tag.
- Then click on the Configuration  Menus

- Create Product Style Tags inserting 'Tag Name' and 'Color'.

Multiple Image Slider

Multiple Image Slider for a Product (Multi Image Gallery)

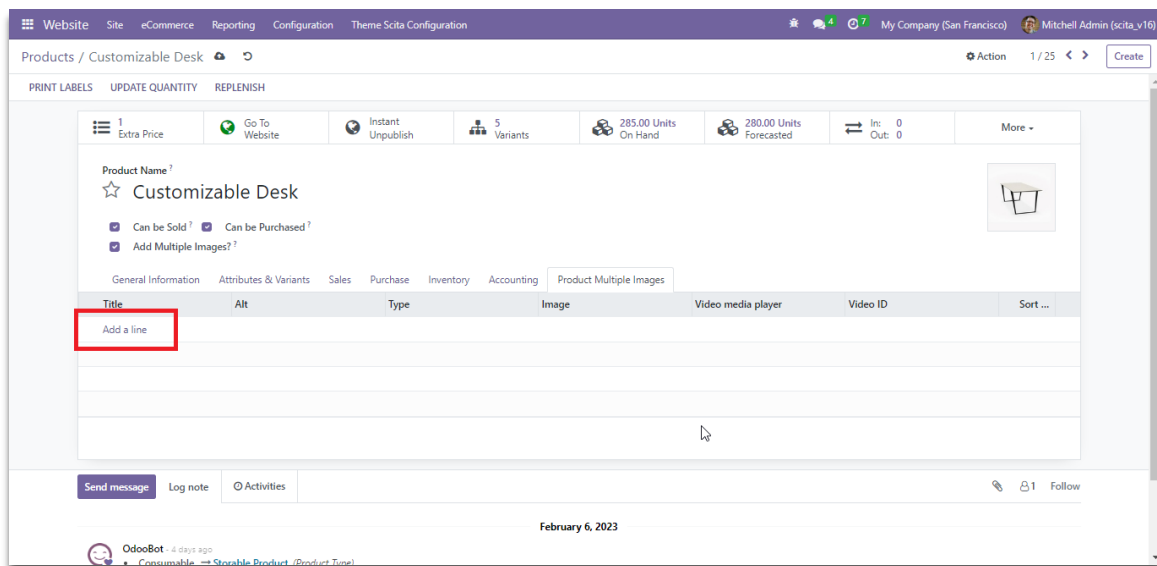

You can display product images with different **colors** and **variants** on the Product details page by configuring them from the backend. You can also display the different images of the product by customizing the **Slider Effects** and **Thumbnail size**.

Backend Configuration

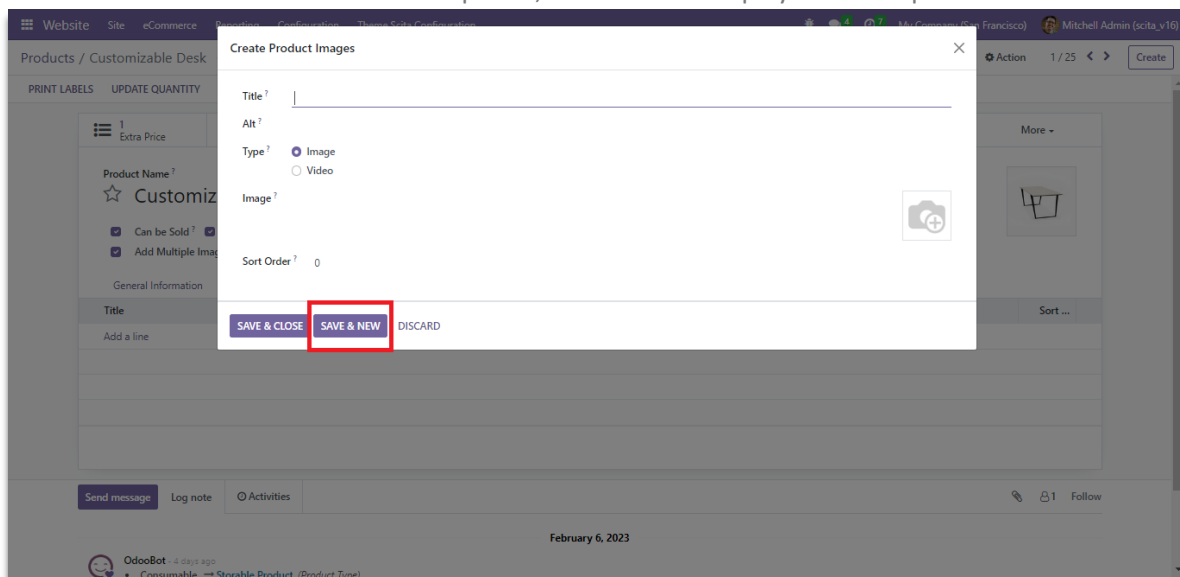

- You can display images of different colors and variant of a product on the Product details page.
- To display Multiple Images, you must insert multiple images during product creation, or you can add multiple images to in existing product by editing it. For that, go to Products -> Products.
- To Add Multiple Images to the Product:
 - Tick the 'Add Multiple Images?' checkbox.
 - Click on the 'Product Multiple Images' tab.

The screenshot shows the Odoo Product Multiple Images configuration page for a product named 'Customizable Desk'. The page is divided into several sections. At the top, there are tabs for 'PRINT LABELS', 'UPDATE QUANTITY', and 'REPLENISH'. Below these, there are buttons for 'Go To Website', 'Instant Unpublish', and '5 Variants'. The main section is titled 'Product Name' and contains a star icon and the product name 'Customizable Desk'. Below this, there are checkboxes for 'Can be Sold?' and 'Can be Purchased?'. The 'Add Multiple Images?' checkbox is checked and highlighted with a red box. Below the checkboxes, there are tabs for 'General Information', 'Attributes & Variants', 'Sales', 'Purchase', 'Inventory', 'Accounting', and 'Product Multiple Images'. The 'Product Multiple Images' tab is selected and highlighted with a red box. The 'Product Multiple Images' section contains a table with columns for 'Product Type', 'Sales Price', 'Invoicing Policy', 'Customer Taxes', 'Product Category', 'Product Tags', and 'Company'. The 'Product Type' is 'Storable Product', 'Sales Price' is '\$ 750.00', 'Invoicing Policy' is 'Delivered quantities', 'Customer Taxes' is empty, 'Product Category' is 'All / Saleable / Office Furniture', 'Product Tags' is empty, and 'Company' is empty. There is also an 'INTERNAL NOTES' section at the bottom.

- Click on the 'Add a line' link to add images for the product.

- By clicking on 'Add a Line', you will be redirected to the "Create Product Image" pop-up.
- Give details like Title, Alt text, select Type, upload a relevant file (e.g. Image), and Sort order.
- The details which are inserted in Title & Alt options, those will be displayed on the product text.

- Click the Save & New button to create a new image. By clicking on Save & Close button, the details will be saved.
- Similarly, you can Add a Video related to that product. Select type of the video which can be
- 'YouTube Video', 'Vimeo Video', 'HTML 5 Video'.

Website view (Front End View)

- Go to the 'Shop' page. Click on any Product. You will find a Multiple image slider if you have added multiple images to the image gallery.

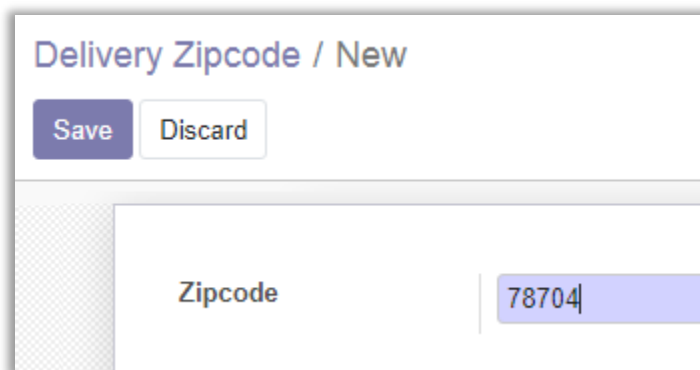

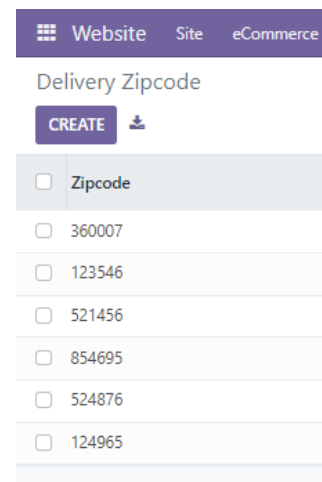

- As per Multiple Product image customization, you will get the Slider Effects option where you can play the slider, zoom in – out the image, and view the slider in Full page view.
- You can see the position of the Thumbnail panel and the size of the images in the thumbnail as per the backend customization.
- If you have enabled the 'Product Text' option, you will get the Product's text details as per inserted in the Product configuration.

Delivery Zip Code configuration

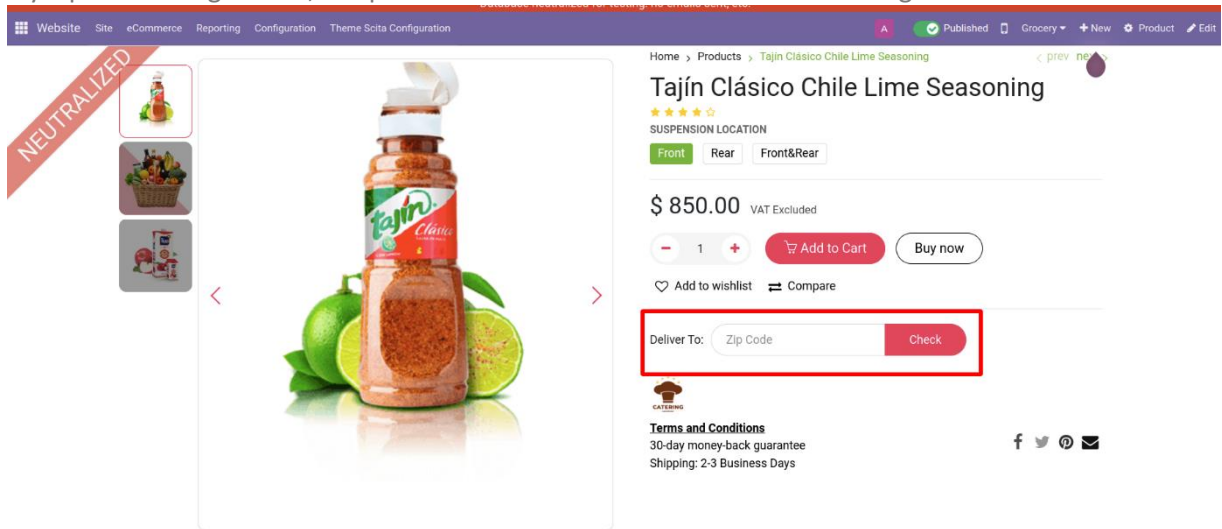

- You can configure the Zipcode. Based on that the customers can check whether the product will be delivered or not in their region.
- Go to Menu  Website  Theme Scita Configuration  Delivery Zip code configuration.

- By clicking on **Delivery Zipcode Configuration**, the list of inserted zipcodes can be seen.
- By clicking on **Create** button, you can insert a Zipcode.

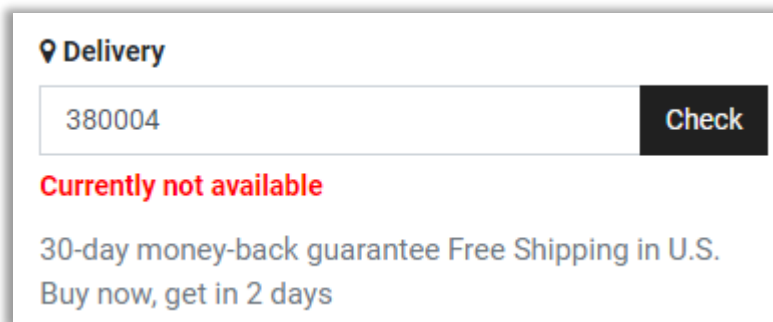

- Insert a Zipcode and save it.

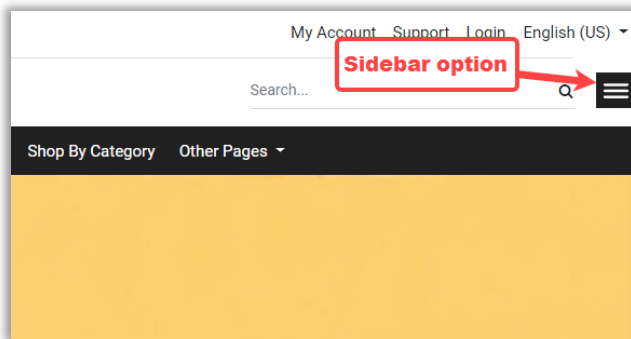

- Now navigating to the Product detail page, if a customer inserts the Zipcode which is already inserted in the Delivery Zipcode configuration, the product will be available to deliver to that region.

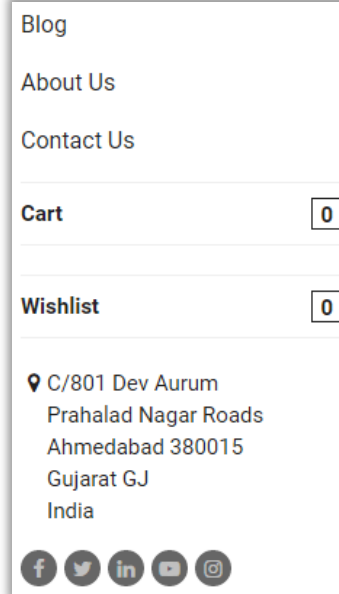

- If the delivery Zipcode is not inserted in the list, the message will be displayed as Currently not available.
- You can configure the “Zipcode details” like text caption and messages from Menu  User & Companies  Companies.

Header Sidebar Configuration

- You can configure the **Header Sidebar** options from **Menu**  **→ Settings → User & Companies → Companies**.

Instant Publish/Unpublish Product

- When you add/edit the products, you need to publish them by opening “Website” and clicking on
- Publish button.
- Now, you can Publish/Unpublish any product instantly after adding or editing it.
- Adding/Editing any product, you will find the Instant Publish/Unpublish option.

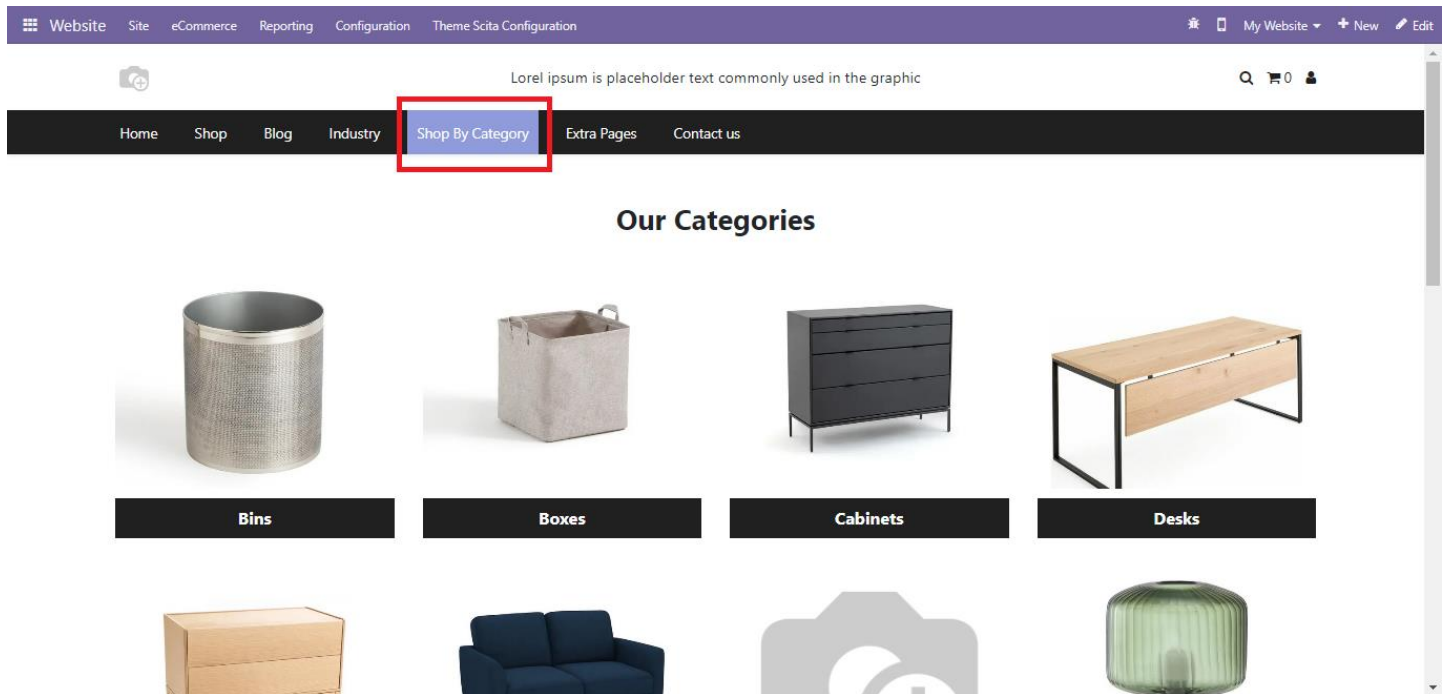

- You can also Publish/Unpublish the products by multiple selections.
- In the Products list, you can find the Instant Publish/Unpublish from the Action drop-down.

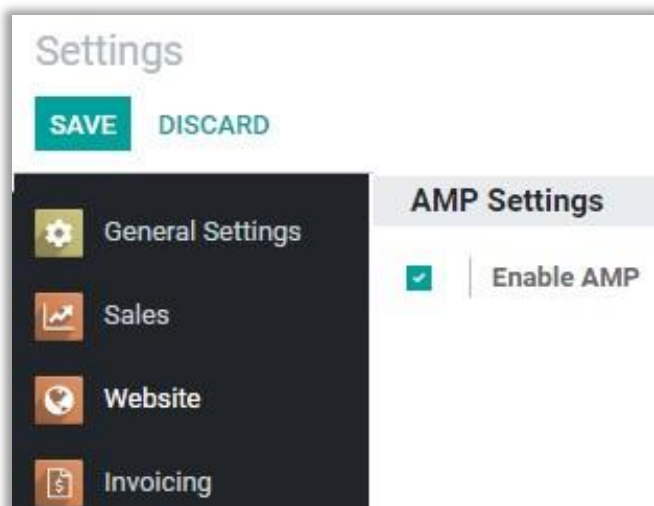

Shop by Category

- The “Shop By Category” menu is given to display the categories.
- By clicking on the “Shop By Category” menu, your customers will be redirected to the Categories page.

AMP: Accelerated Mobile Page

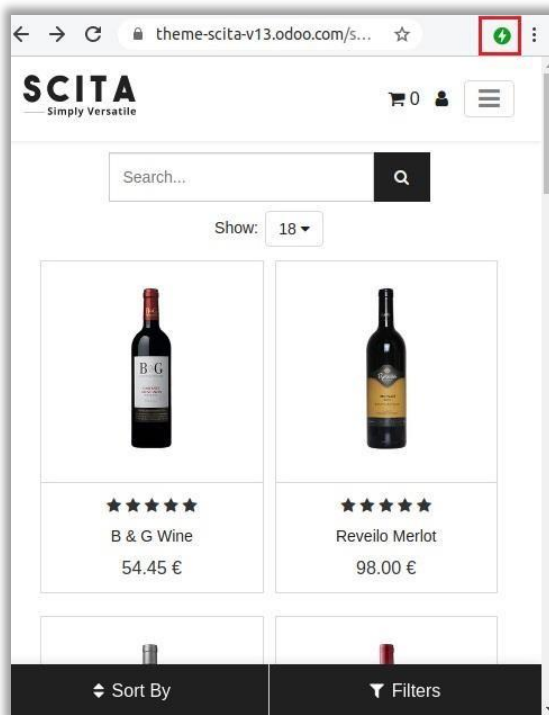

- Making the webpage as AMP (Accelerated Mobile Pages) helps the publishers to improve the speed and readability of their website. Theme Scita has Shop and Product detail AMP pages that will help you provide the best customer experience.

- In Theme Scita, you can enable the AMP from the backend. Go to: Website → Website → scroll to AMP Settings.
- The **Shop** and the **Product details** pages are with the AMP.

- When the customer searches the products related to your website from the Mobile, chances are your AMP page will rank higher than your competitor's normal CMS pages.

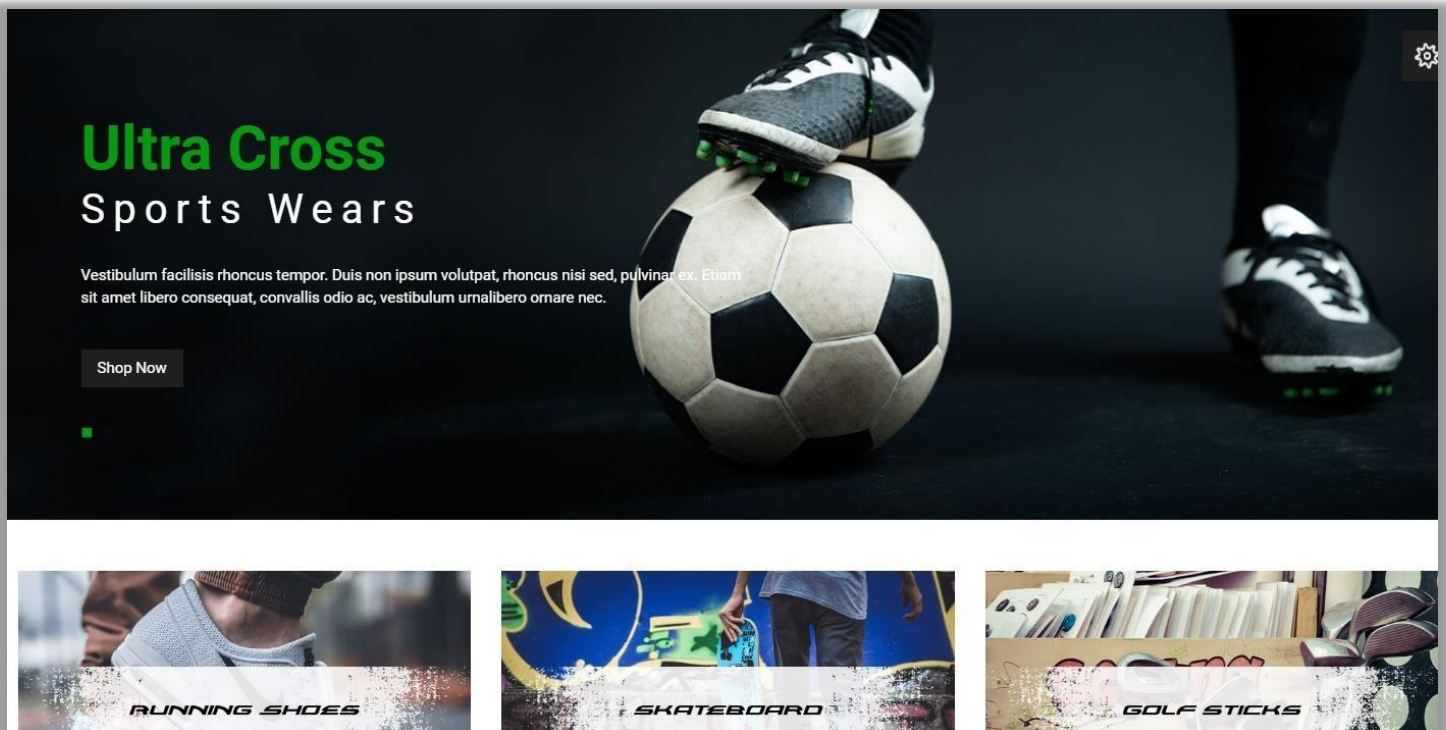

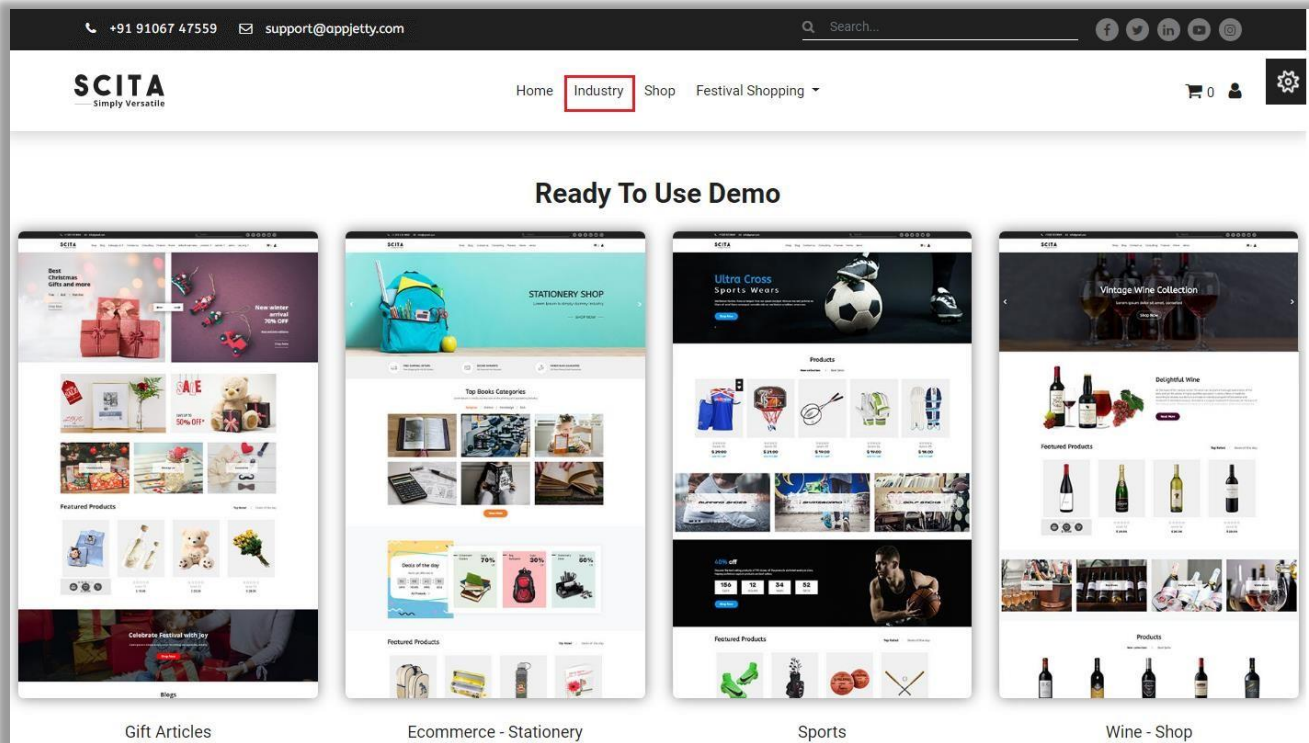

- If your web page is **AMP enabled**, you will get the AMP enabled icon.

Note: Due to AMP having some limitations, the MegaMenu of Theme Scita will not be supported under AMP.

Industry- Ready to Use Demo

- We have provided the Theme Scita Snippets demo as per different business and related themes. You can get it by clicking on Theme Scita Demo.
